

Round Stretch Arcum Tents Heavy Duty Aluminum For Commercial Glass Marquee Cost

Our Product Introduction

Basic Information

- Place of Origin: Guangdong , China
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Features: Waterproof/fire Retardant/UV Resistant/flame Retardant
- Product Name: Wedding Dome Tents
- Frame Material: Hard Pressed Extruded Aluminum Alloy 6061/T6, Surface Oxidation Treatment
- Cover Material: 650g/750g/850g/sqm Double PVC Coated Fabric
- Tent Size: To Be Customized
- Season: Four-season Dome Tent
- Logo: Customized
- Tent Style: Tube Type Tent Stake, Snowfield Nail
- Highlight: Round Stretch Arcum Tents, Arcum Tents Heavy Duty, Arcum Tents Aluminum

Product Description

Round Stretch Arcum Tents Heavy Duty Aluminum For Commercial Glass Marquee Cost

Product Parameter :

Main Structure	aluminum alloy 6061-T6, very durable and strong
Size	Customized
Shape	Round Stretch tent
Cover material Density	Double PVC coated polyester, transparent, water-proof, UV resistant, fire retardant
Sidewall	PVC Walls
Wind loading	100km/h (0.5KN/SQM)
Application	festivals, weddings, backyard parties, and major corporate events
Season	Four-season Tent
Allow temperature condition	-40 degree Celsius~+70 degree Celsius
Ground	All kind of ground can be fixed
Fixing Solution	Expansion Bolt
Installation	easy install and dismantle at any location

Product description

A dome tent is a type of camping tent characterized by its dome-like shape. It's one of the most popular and common styles of tents used for outdoor activities such as camping, hiking, and backpacking. Dome tents are designed to be relatively easy to set up and provide good stability and wind resistance.

Key features of a dome tent include:

Shape: Dome tents are named after their dome-shaped structure, which consists of two or more intersecting poles that create a series of arches or hoops. This design provides a stable and strong framework for the tent.

Freestanding: Most dome tents are freestanding, which means they can stand on their own without the need for stakes or guy lines. This makes them easier to set up and move around.

Pole Configuration: Dome tents typically use a combination of short and long poles to create the dome shape. These poles often slide through sleeves or clips on the tent fabric to hold the structure in place.

Inner and Outer Layers: Many dome tents have an inner tent made of breathable mesh and a separate rainfly (outer layer) made of waterproof material. The rainfly provides protection from rain and wind while the inner tent offers ventilation and prevents condensation buildup.

Capacity: Dome tents come in various sizes to accommodate different numbers of occupants. They are available in single-person, two-person, family, and larger sizes.

Durability: Dome tents are designed to be durable and withstand various weather conditions. The dome shape helps shed snow and water, and the sturdy pole structure adds to their overall stability.

Setup: Dome tents are generally easy to set up and can be assembled by one or two people. Many models use color-coded poles and clips to simplify the setup process.

Portability: Dome tents are relatively lightweight and compact when packed down, making them suitable for backpacking and other outdoor adventures.

Variations: While the basic dome shape remains consistent, there are variations in design and features. Some dome tents may have vestibules for extra storage space, multiple doors for easy access, and various ventilation options.

Dome tents are a versatile choice for campers due to their balance between stability, ease of setup, and protection from the elements. When choosing a dome tent, consider factors such as the number of occupants, intended use, weather conditions, and budget.

Our service

1, we install part of tent for inspecting before shipping out, make sure tent is perfect.

2, will package all the tent well, especially the glass door, or glass wall panel.

3, tent installation manual and video will be sent as well after the order confirm. Our engineer also can fly to your place to guide your installation to

Hard pressed extruded aluminium alloy 6061/T6. European standard, much more harder than normal aluminum alloy. With anodized, the aluminum will not be oxidated and the color will be always new for long time. Lifespan: over 20 years.

The wind load capacity is based on the aluminium hardness.

Hardness achieved 15HW

Tent Fabric Cover:

Fabric cover double PVC-coated

Double PVC coated polyester, 850g/m²,
block-out, water-proof, UV resistant,
EUR fire retardant DIN4102 B1/M2/B1,
snow resistance, tear resistance.
Temperature resistance(°C) :-40°C-70
°C. Lifespan: 8 years

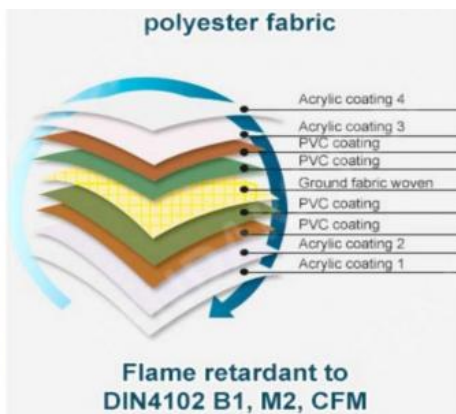

Thickness

Premium grade, high gloss
white, thickness ≥0.67mm

Strength

All covers are made of double-coated
synthetic fiber with best performance
in breaking strength

wind resistant

snow resistant

UV resistan
