production process

Design and Planning:

Gather client requirements and specifications, including tent size, seating capacity, layout, and any special features.
Create detailed drawings and 3D models of the tent's structure and layout using computer-aided design (CAD) software.

Frame Fabrication:

Manufacture the frame components using aluminum or steel tubes and connectors.
Cut, bend, weld, and assemble the frame according to the design specifications.
Test the frame's structural integrity and stability.

Fabrication of Canopy and Sidewalls:

Cut and sew the canopy fabric and sidewall panels based on the tent's dimensions.
Apply any custom graphics, branding, or logos to the fabric.
Seam-seal the fabric to enhance water resistance.

Quality Control:

Perform thorough inspections of all components to ensure they meet quality standards.
Check for proper stitching, welding, structural integrity, and accurate measurements.

Assembly and Testing:

Assemble the frame and attach the canopy and sidewalls according to the design.
Test the tent's setup for stability, proper fit, and functionality.
Verify the installation of accessories and features.

Packaging and Shipping:

Disassemble the tent and pack all components securely for transportation.
Label components for easy assembly at the event location.
Arrange shipping to the event site or to a distribution center.

Fixing method :

1. Expand screw for concrete ground use;
2. Steel pegs for soft ground such as lawn, asphalt;
3. Weight plate for all grounds which cannot be destroyed;
4. Permanent solutions to meet requirements for long time use.

Our service

Custom design the tent according to the clients' requirements ,for example,higher height and unique shape .

*We will set up every tents when we finish the production ,Installation video or pictures can be taken and must be sent to the client to check the quality and make payment of balance before delivery.
