Applications :

1. Outdoor activities

In outdoor activities, the tent can be used as an activity venue, a rest area, a place to display exhibits, etc., can be used in a variety of outdoor activities, such as camping, field development training, weddings, celebrations, etc. According to the needs of activities, the shape, size and material of the tent can be flexibly configured to adapt to various sites and weather conditions. Second, industrial construction sites

2. In industrial construction, the tent can be used as a temporary workshop, warehouse, parking lot, etc., which can meet the needs of temporary construction, and can also be used for project field office, equipment protection, material storage, etc. According to the needs of use, the tent can be equipped with partitions, ventilation equipment, fire prevention facilities, etc., to ensure the safety of use. 3. Agricultural production sites

3. In agricultural production, the tent can be used to build agricultural greenhouses, farm sheds, livestock and poultry houses, etc., to meet the temporary needs of agricultural production, and can also be used as a place for emerging industries such as flower planting and breeding. According to the production needs, the tent can be equipped with shading, heat preservation, ventilation and other facilities to meet the needs of crops, livestock and poultry growth.

In general, the tent has a wide range of applications in various fields, can meet a variety of different temporary needs. With the continuous improvement of people's requirements for environmental protection and economy, the use of tents will become more and more common, and I believe that tents will show their great potential in more areas in the future.

Precautions :

Confirm the safety of the tent: Before the typhoon weather, the enterprise should confirm the safety of the tent. Inspect tarpaulins and supports for damage or weaknesses, and repair or strengthen these weaknesses to ensure that the tent can withstand the impact of typhoon wind and rain.

Prepare spare parts and tools: In advance of typhoon weather, businesses should have spare parts and tools ready in case of an emergency. These parts and tools include tarps, braces, ropes, nails, screwdrivers, etc.

Remove tarpaulin: Before typhoon weather, businesses should remove tarpaulin from the bracket and place it in a safe place. This can avoid the tarpaulin being blown away or damaged by the wind, and can also reduce the burden of the support.

Fixed support: Before the typhoon weather, enterprises should fix the support on the ground to avoid the support being blown away or shaken by the wind. Fixing can be done using tools such as floor nails or rope.

Ensure smooth drainage: Before the typhoon weather, enterprises should ensure that the drainage of the tent is smooth to avoid damage to the tent caused by water. If possible, dig gutters around the tent to get rainwater out quickly.

Avoid placing items around canopies: Before typhoon weather, businesses should avoid placing items around canopies to avoid them being blown away or damaged by the wind. In short, in typhoon weather, it is very important to protect the safety of the tent. The above measures should be taken to ensure the safety and stability of the tent to avoid unnecessary losses and risks.

FAQ :

Q1. Are you factory or trade company?

We are direct factory.

Q2. What is your Payment terms?
