- \* Frame struss: hard pressed extruded aluminium 6061/T6(15HW) which can last more than 15 years.
- \* Fabric cover: high quality double PVC-coated polyester textile, 100% waterproof, flame retardant to DIN4102 B1, M2, CFM, UV resistant, tear resistant, self-cleaning ability, etc.
- \* Connector: strong hot-dip galvanized steel
- \* Allowed temperature condition: -30 degree Celsius~+70 degree Celsius
- \* Wind load: max.100km/h (can be reinforced)
- \* Snow load: 25kg/sqm (snow can't stay if use big degree roof pitch design)
- \* Easy to be assembled and dismantled, movable.
- \* No pole inside, 100% available interior space.

#### Precautions :

Tarpaulin can not pull up, there are generally three reasons:

First, the four corners positioning is not good

The four corner positioning is very important, and it is necessary to mark the point position in advance, and then fix and build the tent position according to the mark.

Second, the foot is loose

If the footing is not fixed in advance using the counterweight block or expansion screw, it is easy to generate deviation when building, resulting in the positioning of the four corners above, and the pulling of the tarpaulin will become very difficult.

Three, the two sides of the force is not balanced

In the process of pulling the tarpaulin, because everyone's strength is not the same, the tarpaulin is easy to tilt and finally get stuck. Only by maintaining balance, tarpaulin can be installed smoothly and quickly.

#### Order process :

First we will determine your use needs, and then determine the area and height (span) of the tent. After getting the customer's information, we will arrange designers and sales door-to-door measurement work to ensure that the tent can fit the surrounding environment, convenient for designers to design.

The designer is a more important part, after confirming the area and the role of the tent, the designer will carry out a preliminary design, and then modify it according to the needs of the party, and let the party confirm after the modification. After the designer confirms the drawing, it will be handed over to the designer in the production department. The designer will place an order for the production demand, and then the workshop will produce the corresponding output.

After the completion of production, we will generally conduct trial construction, and confirm the preliminary appearance of the tent with the customer, so as to facilitate the modification of some details. If Party A does not modify the requirements, subsequent production tasks will be carried out.

Finally, logistics procedures are carried out, and the logistics department will contact the truck driver for delivery. After all the procedures have been completed, our work is roughly over. Of course, if you need to build the process, we will arrange professional workers to install, so that Party A is satisfied!

#### FAQ :

##### 1. Are you tent factory?

Yes, we are professional tent manufacturer in Guangdong of China.  
We assure you our prices are based on factory.

##### 2. What is the MOQ of the tent?

One Set.
