#### Why choose the wedding tent ?

Entering the palace of marriage, for everyone is both nervous and happy. The wedding venue is one of the most important factors. Many couples and their families prepare for their wedding up to a year in advance. Including venue, facilities, guest attendance, etc. The wedding banquet is one of the most important parts of the wedding, many people will choose some hotels to handle, but generally this kind of hotel wedding may need to book several months in advance. Therefore, you can choose the outdoor way to carry out the wedding, and the wedding tent is one of them can be considered. In some European and American countries, many weddings will choose this outdoor wedding tent to carry out their wedding. For the wedding tent to consider only the tent to build the venue, relative to the hotel, the outdoor wedding tent can choose a larger range, this is because the wedding tent is very strong for the adaptability of the venue, so many people will choose lawn and beach to hold their wedding. The time required to build the wedding tent is also very short. According to the actual needs, the tent company will arrange enough manpower to build, under normal circumstances, it only takes one day. So a lot of people choose this.

#### Precautions :

How to disassemble the tent need to pay attention to what?

### 1: Disassembly steps

In general, the installation is required to be carried out step by step, while the disassembly is also to be dismantled in accordance with a certain step method, the order before and after should be correct and stable, which is not only to ensure that the disassembly does not lead to the temporary collapse of the tent, which is a serious risk, but also to ensure that each component is intact and can be rebuilt again

### 2: Technician's safety

The safety of technicians is also very important. This is to pay attention to the secret nature of the disassembly process. When disassembling, we must do a good job of peripheral safety work, exclude the surrounding crowd, and ensure the emptiness of the site.

### 3: Manage the demolition of tent materials

If parts or accessories are damaged or lost during or after disassembly, they should be dealt with in time, and do not drag the tent body on the ground to avoid 2 times of damage. The disassembled parts should be classified and stored to ensure that they can be used again normally next time.

### FAQ :

what's the price of the tent?

The price of the tent is determined by the size of the tent, and the price of the tent is calculated per square meter, and the larger the area of the tent, the cheaper the unit price. If the owner of the tent aluminum alloy profile, the price of our tent will also fluctuate according to the market price of aluminum alloy.

What's the safety features of the tent?

From the point of view of wind resistance, the material used in the tent is aluminum alloy profile, and under normal circumstances, our tent can resist the wind speed of 8-10. We can be customized according to customer requirements and can ensure the safety of the tent; The snow carrying capacity of the tent is also a standard for us to consider, and under normal circumstances, the snow carrying of our tent is about 15-20cm.

How tent building approval process?

The tent building is a temporary building, and the amount of money is based on local policies. In the approval process is relatively simple, if the local does not allow the construction of fixed buildings, then the construction of aluminum alloy tents is appropriate.
