

## Custom Waterproof Large Wedding Marquees Durable Modern Style Temporary Tent For Backyard Party

### Our Product Introduction

#### Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

#### Product Specification

- Product Name: Unique Wedding Marquees
- Aluminum Profile: High Pressed Extruded Aluminum Alloy
- Tent Roof Fabric: 850g/sqm Block Out White PVC Fabric, waterproof, Fire Retardant M2
- Waterproof: 100%
- Fabric Color Option: Customized Or White, transparent, blue, yellow, green, red
- Snow Loading: 0.5kn/square Meter
- Wind Loading: 80km/hour
- Ground Situation: Grassland, earth Land, asphalt Ground, cement Ground
- Highlight: Custom Large Wedding Marquees, Waterproof Large Wedding Marquees

## Product Description

### Custom Waterproof Large Wedding Marquees Durable Modern Style Temporary Tent For Backyard Party

#### Product Specification:

|                       |   |
|-----------------------|---|
| Structure             |   |
| Aluminum profile      | High pressed extruded aluminum alloy                              |
| Steel parts           | Hot-dipped galvanized , Passed 144 hour of salt spraying test     |
| Raw Material          |   |
| Top roof fabric       | 850g/sqm(24 Ounce) laminate Vinyl, waterproof , fire retardant M2 |
| Side panels           | 650g/sqm(19 Ounce) laminate Vinyl, waterproof , fire retardant M2 |
| Loading Specification |   |
| Wind Loading          | 80km/hour   |
| Snow Loading          | 0.5kn/square meter  |
| Waterproof            | 100%  |

#### Features :

The tent is composed of two parts is composed of gold frame structure and tarpaulin these two parts.

The tent is currently based on aluminum alloy, aluminum alloy material product hardness and service life are much higher than the previous steel structure, especially his wind resistance can generally resist 8 strong winds, the snow carrying capacity of the tent is also between 50-20cm.

Now we focus on tarpaulin, tarpaulin in our tent building role is very large. Considering the various uses of tarpaulin, the requirements that should generally be met are:

- (1) light weight, easy to fold, easy to handle;
- (2) High strength, wear resistance, long service life;
- (3) Good waterproof performance and air permeability, anti-coagulant inside;
- (4) Acid and alkali resistance, anti-mildew, anti-corrosion;
- (5) Good weather resistance, flame retardant, fire prevention;
- (6) No core suction effect, there will be no moisture conduction phenomenon. Tarpaulin generally requires a "three prevention" function. That is, waterproof, fireproof (flame retardant), mildew proof.

In order to prevent sudden special environments, each tent is added with counterweight facilities such as cement blocks, expansion screws, ground nails, load-bearing plates, steel... ..

#### Tent manufacturing process :

1, cutting material: CNC cutting profiles, accurate and efficient.

After the raw materials of aluminum profiles are ready, they are accurately cut into various sizes and shapes according to the requirements of the drawings, and then measured and checked on site to prevent deviations and ensure the accuracy of the cut materials.

2, milling slot, drilling: the technical department according to the drawing requirements input programming, machining center for automatic operation, milling slot, tool change, drilling integration completed, improve work efficiency, strict quality control, to ensure that the hole position is consistent.

3, iron welding: manual gas welding, strict inspection.

- (1) Gas protection welding has a wide range of applications, and can be welded thin plate, thick plate and all positions of welding
- (2) Strong rust resistance, gas protection welding on the welding parts of the rust, oil and water, not as sensitive as other welding methods, with good gas control ability.

4, spare parts drilling: scattered small parts, more suitable for rocker arm type small drilling machine.

The spare parts are first clamped on the platform of the rocker arm type small drilling machine, and the drilling position is determined for drilling.

5, grinding and deburring: cutting and CNC machining after the edge will be relatively sharp, in the use of the process is easy to cause damage, grinding for these burrs.

6, cutting tarpaulin: machine cutting, accurate, efficient, time-saving, labor-saving.

The whole roll of tarpaulin raw materials frame on the roller of the cloth cutting machine, the cloth cutting workshop according to the drawing requirements and quantity, batch cutting operation, to ensure that the size of each tarpaulin is unified, reduce errors.

#### FAQ :

Q1.Does your tent be able to installed repeatedly? What is the life span?

Sure, our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

Q2: How long is the warranty period?

Guarantee is five year. During the warranty period, we shall repair or replace the damaged part accordingly because of any damage due to quality problem.

Q3:How is the quality of the product guaranteed? Our products will be strictly tested by the quality inspection department before leaving the factory, and each product will be strictly controlled to ensure product quality.

Q4. How can you get quotation for your projects?

You can contact us by email, phone, Alibaba TM, WhatsApp, Skype, Viber and so on 24\*7 and you will get reply within 8 hours.

Q5:How is the quality of the product guaranteed?

Our products will be strictly tested by the quality inspection department before leaving the factory, and each product will be strictly controlled to ensure product quality.

Q6. How can you get aquotation for your projects?

You can contact us by email, phone, Alibaba TM, WhatsApp, Skype, Viber and so on 24\*7 and you will get reply within 8 hours.
