Product Specification:

Structure	
Frame material	Reinforced Aluminium Alloy 6061
Roof cover	Double Coated PVC
Raw Material	
Top roof fabric	water proof, 850g/m ² . Flame retardant.PVC-coated Polyester.
Side panels	650g/sqm PVC-coated Polyester,glass wall,ABS wall
Loading Specification	
Wind Loading	100km/hour
Snow Loading	0.5kn/square meter
Features	resistant to wind, snow, and rain,Waterproof,Fireproof,Uv resistant

Features :

Customization: These tents can be customized to match the wedding theme, color palette, and overall style. Decorations, lighting, and furnishings can be tailored to the couple's preferences.

Clear or White Fabric: Many wedding marquee tents are made from clear or white fabric, allowing natural light to filter in during the day and creating a romantic glow in the evening.

Panoramic Views: Clear or transparent sections in the tent offer panoramic views of the surrounding scenery, whether it's a beach, garden, or other outdoor setting.

Climate Control: Wedding marquee tents can be equipped with heating or air conditioning systems to ensure the comfort of guests regardless of the weather.

Flooring Options: Flooring solutions such as wooden or carpeted surfaces can be added to create a stable and comfortable surface for guests to walk on.

Chandeliers and Lighting: Chandeliers, hanging lights, and string lights can be suspended from the tent's frame to create a magical and romantic ambiance.

Why choose Large Wedding Marquee :

When holding an outdoor wedding, weather conditions are an uncontrollable factor. Sometimes there may be strong sunshine, high temperatures or sudden thunderstorms.

The temporary tent can provide a place for the couple and guests to shelter from the sun and rain to ensure the smooth progress of the wedding.

The construction of temporary tents is very convenient, and the layout of the tents can be adjusted according to the theme and style of the wedding.

The size of the tent can be adjusted according to needs, which can adapt to different sizes of weddings. Couples can design the wedding venue according to their own preferences and needs to create a unique wedding scene.

An important feature of an outdoor wedding is that it allows guests to feel the beauty of nature up close. The use of temporary canopies can ensure the comfort of the interior, while allowing guests to still enjoy the beauty of the outdoors.

Awnings are often designed with transparent materials such as glass or plastic Windows that allow sunlight and views to flood into the interior. In short, using a temporary tent to hold an outdoor wedding is a very good choice. Both couples and guests can enjoy a romantic and memorable wedding.

Advantage/ Selling points:

Fast put into use: The construction of the tent is fast, and it can be put into use in a short time to meet the emergency needs of the wedding. Compared with traditional buildings, the construction cycle of the tent is shorter, and it can quickly respond to changes in market demand.

Mobility and reusability: The canopy can be moved according to the wedding needs to adapt to the storage needs of different locations and scenarios. If the wedding needs to relocate or adjust the location of the tent, the tent can be quickly disassembled and rebuilt, reducing the loss of buildings and waste of resources.

Scalability and flexibility: The canopy can be expanded by adding modules to meet the growing demand for space. In other words, the tent can be flexibly adjusted according to the needs of the wedding, avoiding the waste caused by the construction of a fixed size of space.

In the context of green environmental protection, the tent as a sustainable warehouse solution, has obvious application advantages. Its flexibility, mobility, energy saving, emission reduction and sustainability characteristics make its application prospects in the field of warehouse more and more broad.
