Product Description

Custom Shape Outdoor Permanent Event Aluminum White Party Marquee Strong Frame

Feature :

Heavy-Duty Frame Material: The frame should be constructed from strong and durable materials like aluminum or steel to ensure it can withstand various weather conditions, including wind and rain.

Weather-Resistant Coating: A weather-resistant coating, such as powder coating, can help protect the frame from corrosion and rust, increasing its lifespan.

Reinforced Joints: Look for marquee frames with reinforced joints, which provide added stability and reduce the risk of the frame collapsing or bending.

Interlocking Components: Marquee frames with interlocking components are easier to assemble and disassemble, making setup and teardown more efficient.

Adjustable Height: Some marquees offer adjustable leg heights, allowing you to customize the canopy's height to suit your needs and the terrain.

Stake or Anchor Points: Make sure the marquee has secure stake or anchor points to keep it firmly anchored to the ground, especially in windy conditions.

UV-Resistant Canopy: The white canopy should be made from UV-resistant material to prevent it from fading or deteriorating due to sun exposure.

Waterproof Canopy: A waterproof canopy is essential to keep your guests dry in case of rain. Look for a canopy with sealed seams and water-resistant material.

Fire-Retardant Fabric: Ensure that the canopy material is fire-retardant to meet safety regulations and minimize fire hazards.

Easy Assembly: Look for a marquee with a user-friendly assembly system, ideally one that doesn't require special tools for setup.

Customization Options: Some marquees offer customization options, such as removable sidewalls, windows, or branding options. Consider whether these features are important for your event.

Transportation and Storage: Check if the marquee comes with a carrying bag or case for easy transportation and storage.

Warranty: A manufacturer's warranty can provide peace of mind and assurance of quality. Be sure to understand the warranty terms and conditions before purchasing.

Size Options: Choose a marquee in a size that suits your event's needs, whether it's a small gathering or a large party.

Ventilation: If your event will take place in hot weather, consider a marquee with ventilation options, such as mesh windows or vents, to keep the interior cool.

Accessories: Consider any additional accessories you may need, such as lighting, flooring, or heating elements, and ensure that the marquee can accommodate them.

Safety Features: Look for features like secure zippers, buckles, and straps to enhance safety and prevent accidents.

Professional Installation: If you're not comfortable with assembling the marquee yourself, check if the manufacturer offers professional installation services.

How long for the tent ?

The first thing to worry about is the safety issue, which plays a very important position, so as to improve the application of temporary housing, it must also ensure that the use of the tent meets the requirements. There must be a standard service life, combined with the fixed quality of the tent, how long can the general service life be?

The first point: the comparison of different materials

Relatively speaking, the material of the tent is divided into aluminum alloy, steel, PVC material, various parts, but the choice is a class of aluminum alloy tent, the quality will be better, even if long-term outdoor use can also have a long service life, the general service life is more than 20 years.

The second point: the use of performance guarantees

For PVC tarpaulin, after special surface treatment, it can not only block wind and rain, but also have anti-ultraviolet, moisture-proof, flame retardant and other properties, especially to make the tent is not affected by weather factors, to ensure that it can be used for a long time in the household, and the service life can even reach 15-20 years.

Third point: as a special use

For example, the tent is used as a warehouse, the general service life is 6-12 years, if the normal use of 10 years, the focus is to strengthen the maintenance knowledge of the tent, to promote the service life of the tent can be longer and longer.

From this point of view, the service life of the tent produced by our manufacturer also has long points, the important thing is to highlight the quality of the tent from the maintenance measures, and explain the basic nature of safety in use. It is better to recommend fixed maintenance.

FAQ :

Q1.why should you buy from us not from other suppliers?

TENDARS is located in Guangzhou. The main product line of TENDARS includes aluminum outdoor event tent, aluminum lighting truss, portable stage and tensile membrane sheds. With years of professional manufacture,our customers have been all of the world.

Q2. Can you do OEM for me?

We accept all OEM orders,just contact us and give me your design.we will offer you a reasonable price and make samples for you.

Q3.How many colors for selection ?

A3:More than 30 colors. We will provide you with the color card , pls choose your favorite from it.

Q4.How to choose the size of tent

A:The size depends on how many people you want to stand,sit or have dinner in this tent. And the size also depends on the land space you will put up this tent.Normally,we advise 1-1.5sq.m/person.

Q5.how can we guarantee quality?

Always a pre-production sample before mass production;

Always final Inspection before shipment;
