40m	5m	11.48m	15.2m	5m	300x120x5mm (4 - channel)

How Many Days To Build A Party Tent?

First, the time it takes to build a party tent can be affected by several factors. For example, ground conditions. If you are planning to set up your tent on grass or hardened ground, it usually takes less time to set up; however, if you are planning to set up on the sandy or uneven ground, we may need to do some preparation work first, such as building a wooden ground platform to ensure the stability of the tent. This will take more time, but safety and comfort are our top priorities.

Second, the size of the party tent will also affect the setup time. Smaller canopies, such as 3×3 meters, usually only take a few hours to set up. But if it is 10×20 meters or larger, it can take half a day or more to complete the installation.

Of course, the quality of the material is also crucial. "High-quality aluminum alloy is the main material for our party canopies, which is not only strong but also very light and easy to set up. The covering material of the canopy is durable PVC synthetic fabric, which is waterproof and sunproof. Good materials ensure that the canopy remains stable and durable in all weather conditions.

Finally, we offer a wide range of party canopies in different styles and colors, from stylish and simple to gorgeous and romantic. Not only that, but

we also offer a personalized customization service to create your unique canopy according to your preferences and party theme.

Professional Service

Strategically distributed in various regions of the world, each site has established professional technical, design, and sales teams to provide the most comprehensive pre-sales and after-sales service for customers in various regions.

Quality Guarantee

Our every product from research and development to production is following the highest standard requirement and has passed ISO 9001:2008

Quality Management Certificate to make customers use it with confidence.
