Traditional house & Storage tent :

In order to better solve the problem of full storage of warehouse goods, improve the defects of fixed warehouse relocation difficult, from the traditional sense of the warehouse construction form to transform and redesign, the original fixed warehouse building into a flexible disassembly, rapid relocation, reusable industrial storage tent, for many enterprises to solve the problem of difficult warehouse expansion and difficult management. As a temporary architectural form, the structural advantages of industrial storage tents are: regular design, interchangeable structure, unlimited extension or shortening. Using this advantage, enterprises can make full use of every space, completely free to build. Compared with the cumbersome process of traditional warehouses, industrial storage tents only need to prefabricate all the tent components in the factory in advance, and there is no need to carry out complex foundation treatment after being transported to the site, which greatly saves time and cost, and more importantly, can also reduce a large amount of expenses for enterprises, and can rapidly expand or shrink the area at any time in the future, which is why, Prefabricated industrial warehouse buildings are gradually replacing traditional warehouses and becoming the warehouse form that enterprises will choose in the process of development and growth.

Why choose tent for storage or industrial house?

Traditional warehouse, need to use concrete and other poured into, high construction cycle, and cost increase, our new industrial storage tent in the technology has been improved on the basis of the construction can be used immediately, and the use of a long cycle, the 6061-T6 aviation aluminum has the advantages of light material, corrosion resistance, oxidation resistance, which is not completed by the traditional warehouse. In addition, our industrial storage tent can also choose different walls according to different goods storage, to ensure the safety of goods, with a high

cost performance. There is also a popular reason for our industrial storage tent is that the industrial storage tent because there is no bearing column inside the tent, the internal utilization rate is high, and the space is spacious, and the driving of warehousing personnel and transportation vehicles is unimpeded and without obstacles.
