Features :**High light transmission**

PVC material has light transmission performance to meet the indoor lighting requirements

Good thermal insulation

Double layer insulation materials can be customized to achieve thermal insulation, heat insulation and wind proof

Low building requirements

To achieve the minimum foundation requirements, it does not need expensive engineering construction and building foundation, and can be installed on the outdoor flat ground such as the yard, grass an so on

Low building requirements

To achieve the minimum foundation requirements, it does not need expensive engineering construction and building foundation, and can be installed on the outdoor flat ground such as the yard, grass an so on

The construction steps of large-scale industrial storage tents are as follows:

1. Preparation of tools: including necessary forklift trucks, climbing vehicles, ladders, scaffolding, etc.
2. Ground positioning: Base chassis positioning according to the drawing provided by the tent engineer.
3. Material layout: the required materials are scattered and placed near the corresponding position, which is convenient for follow-up work.
4. Frame assembly: one unit frame connection, including base, column, inclined beam, roof ridge, etc.
5. Starting from the first unit, the frame is erected and assembled one by one until the whole frame is connected.
6. Ceiling installation: PVC tarpaulin on the roof, unit by unit installation

7. Triangle tarpaulin installation: triangle tarpaulin on each gable 1 to
8. Side wall tarpaulin installation: the big tent every 5 meters for the unit, each unit 1 on the side wall
9. Inspection: After the above work is completed, the entire tent is inspected to ensure that the tarpaulin is tight and straight, and each part of the screws are fastened.

Our advantages:

1. German technology and manufacturing standards
- 2 Design: can be customized according to your specific needs, and highlight the beauty of your site
- 3 Cost: explain your budget, we will do our best;
- 4 Cost performance: the same quality of products, not afraid of you compare
- 5 professional: the maximum span of 80 meters, no internal column, wind and snow resistance
- 6 quality: selected raw materials, innovative and technologically advanced team and production equipment
7. ISO9001 quality certification
