20m	≈45 people	≈90 people	≈135 people	≈180 people
25m	≈55 people	≈110 people	≈165 people	≈220 people

What's the common sizes of large industrial storage tents?

The size requirements of industrial storage tents in different shapes are very different, so what are the common sizes of large industrial storage tents?

1. Herringbone roof This time for the customer to build a 40*125m herringbone canopy, covers an area of 5000 square meters, the height of 12.4m. According to the high temperature and rainy weather factors, we realized the solution for our customers - the canopy of the canopy is a combination of colored steel plate and thermal insulation cotton, which makes the canopy more durable and easy to cope with the amount of rain. The tent is on the sea facing the wind volume, can resist 10 strong winds, to ensure the safety of the tent and the safety of customers. Rock wool board is used around to achieve flame retardant and heat insulation effect.

2. Curved roof This time to provide customers with a 48*30 curved canopy covering an area of 1440 square meters, the side height of 6 meters, the top height of 16 meters. In such an area, the various configurations of the tent are stress-free for us! The canopy is made of tarpaulin, which is better than ordinary tarpaulin in tensile strength, strong self-cleaning, good gloss and long service life! The overall appearance is more high-end, the quality of a comparison can be seen! Surrounded by rock wool sandwich board, in this design selection, in addition to rock wool sandwich board to give full play to the unique properties of rock wool core material.

Pay attention to details:

When determining the type and specifications of the tent required, it is also necessary to confirm the situation of the site, because the construction

and fixing methods of different sites are not the same, the tent manufacturers will give you the most appropriate suggestions according to the site,

such as the conventional expansion bolt is tightened and fixed, if the cement floor can not be damaged, you can choose the way of bearing. If you

want to platform, you also need to prepare in advance, etc. Only to confirm the good situation can the manufacturer be prepared in advance!

In addition, we also need to consult the manufacturer to be able to ship and transport the time to build, to ensure that the tent can be built and used before the event is held, generally within 800 square meters of the tent, it can be easily built in just one day!

Finally, pay attention to how long the manufacturer provides quality assurance, after-sales service, whether the activity process will be sent to maintain the tent, etc., these are the final selection of tent points!

How to choose the right tent? If you have a tent needs, but do not know much about the tent, then you are welcome to consult our tent, our professional team can recommend the most suitable tent plan according to the needs of your activities for you, and provide you with a very favorable tent price.

FAQ :**Q:Why do I need to know the use of tents and local climate?**
