

Industrial PVC Aluminum Temporary Storage Tents Outdoor Heavy Duty Tent Production

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

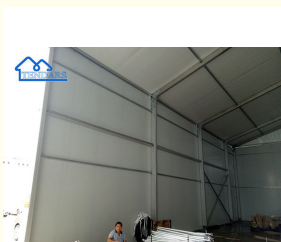

Product Specification

- Product Name: Outdoor Temporary Storage Tent
- Frame: Aluminum Alloy
- Fabric Material: Double PVC-coated Fabric, waterproof, fireproof, sunproof
- MOQ: 50m²
- Feature: Durable
- Wind Rating: Level 8
- Application: Storage, Event, Wedding, Party, exhibiton, Trade Show
- Highlight: Aluminum Temporary Storage Tents, PVC Temporary Storage Tents, Industrial large outdoor storage tent

Product Description

Industrial PVC Aluminum Temporary Storage Tents Outdoor Heavy Duty Tent Production

Description :

1.Product name	Storage tent
2.Material	pvc and aluminum alloy
3.MOQ	35 Squares
4.Sample	(1) Within 3 working days without customization (2)About 3-7 working days with customization

Why choose tent for storage ?

There is only one kind of storage with 100% utilization of storage space, and the reason why it is liked by all walks of life is mainly to bring more benefits.

- 1, storage tent construction, for the ground requirements do not need to lay the foundation, save additional investment and construction time.
- 2, design, construction 5-10 days (within 3000 square), directly solve environmental problems.
- 3, according to different local policies, only need to report can (temporary construction).
- 4, the use of low cost, by pvc shading cloth, insulation material and low maintenance costs, reduce the maintenance cost within the cycle.
- 5, the use of aviation aluminum alloy and PVC material tarpaulin, the use of up to 10-20 years. Aluminum alloy itself has value, and inflation can also play a role in appreciation over time.

Advantages of warehouse tents:

- First, no matter what enterprises, as long as there is a need for expansion and development, they can increase or decrease the area at any time;
- Second, you can customize the size for free, the span can be 80 meters, or even larger, so no matter how large your project can be realized;
- Third, the construction speed is fast. In the case of sufficient personnel, thousands of square meters of tents can be built in a day;
- Thour, As a temporary building, the relevant approval procedures are simple and can be installed and constructed at any time;
- Five, High utilization rate of internal space. The canopy adopts a large net span structure, without any internal pillar support, the space can be greatly utilized;
- Six, high wind resistance. The frame of the tent is made of aluminum alloy, and the wind resistance level can reach 8. The snow carrying capacity is 15-20cm. Tarpaulin has the effect of flame retardant, wear resistance, waterproof, anti-ultraviolet and so on.

What is the difference between engineering warehouse and traditional industrial warehouse?

Fast and easy to set up and disassemble, whether for long-term leasing or direct purchase, the economical and flexible solution can meet the growing needs of enterprises for production and storage space. The biggest feature of the engineering warehouse is fast. 5000 square meters warehouse can be built in 5 days, with the advantages of flexibility and mobility;

The 100% utilization rate of the internal space is a good choice to solve the temporary storage problem in the cargo expansion season. Engineering storage tent as a temporary building, compared with the mold structure, steel structure in its construction speed has obvious advantages, modular design, LEGO construction method to solve the transportation and on-site construction problems, standard tent from the order to the completion of construction 15 days of 10000 square construction project delivery.

This is the mold structure and steel structure is incomparable. And the construction process will not add additional burden to nature. The ground won't break through. The service life of the prefabricated building canopy frame can be up to 30 years, whether you are using it as a temporary or long-term factory use can solve the problem of insufficient space.

The approval and filing procedures are simple. After the end of the project, the aluminum alloy frame can also be recycled by the manufacturer, and there is no need to worry about warehousing problems in the later stage. Traditional fixed buildings need to do basic ground treatment, while engineering storage tents do not need basic survey, deep excavation and burial processes, and can be built in any factory.

FAQ :

Q1 : Why choose us ?

A : Low MOQ for Nobel products , high quality that can meet US or EU standard.We provide high level service , accept OEM and Trade assurance order. You can shop without worries.

Q2 : What are price terms?

A : The price listed is EXW price. There might be additional forwarder costs depends on different forwarder and shipment method. The price may fluctuate due to material cost / labor cost / exchange rate change. Please consult our sales people before confirming an order.

Q3 : Does the product price include logo ? How can I make my custom logo and packaging ?

A : Product prices listed do not include labels, and products are usually packaged in plastic bags. If you need a logo or custom packaging, you can contact our sales staff for specific prices.

Q4 : How long do you need to produce the goods ?

A : For products in stock, we can deliver to you within 5-10 days. The usual lead time for mass production is 20-45 days, depending on the order quantity.

Q5 : How to place order and arrange payment ?

A : You can contact our sales staff to draft a PI or Trade Assurance order for you, or you can send us inquiry. We will confirm the order after receiving your information, once the order is confirmed by both parties, you can arrange the deposit payment. TT transactions are the preferred payment method.
