White,Clear,Green,Blue, Yellow etc

Frame material
Aluminium6061/T6

Size
Customized Size

Cover material
double PVC-coated fabric,waterproof,fireproof,sunproof

Max allow wind speed
100km/hour

Lifespan for Aluminium
15-20 Years

Lifespan for Roof and Sidewall
8-10 years

Application
Storage, Event,Wedding,Party,exhibitor,Trade Show

Why choose tent for storage ?

First, storage sheds are more conducive to transportation and storage. The key tarpaulin is collapsible, and the volume of the structure will be smaller after removal.

Secondly, the space utilization rate is high. Unlike traditional warehouses, there is no load support inside the warehouse, and it can be applied anywhere, which also means that the construction can be freely promoted or divided according to the size of the place. Unlimited internal role. If it is a traditional warehouse, then they will only be used to store products. However, the interior of the warehouse is flexible and unstable. With the coordination of spare parts, they can be partitioned internally, turned into dressing rooms, and can also be made into storage rooms to store large and medium-sized machinery and equipment.

The use of storage canopies can cope with the company's warehousing difficulties, especially in the competitive e-commerce industry. How to store the goods to be shipped becomes very important. The application of storage sheds can deal with your problems, they are easy to build, and they also have the function of storage. Due to the unique advantages of storage tents, many places have begun to use a large number of.

The construction cost of storage tents is low, and can be recycled, not only the storage tents in the enterprise is also environmental protection tents, the utilization effect between the two, are very popular, for the enterprises to solve the environmental protection and warehousing problems.

Each enterprise needs different storage functions, can the tent warehouse meet so many requirements?

Not limited to the internal function, if it is a traditional warehouse, they may only be used to store goods, but the interior of the warehouse is flexible, the construction of materials such as hard walls, sandwich panels, rolling gates, etc., and even including such professional machinery as the negative machine curtain, can make the interior of the tent achieve a variety of functions, in the cooperation of these accessories, They can be made into internal compartments to become offices or lounges, etc., or they can be made into workshops for production. Meet the needs of different enterprises.

Can the tent warehouse be exposed to the sun?

Want to store flammable goods, do not know the safety? General tent in the absence of ventilation, summer exposure to the maximum indoor

temperature can reach 80-90 degrees (reference car temperature), so flammable and explosive items are still more dangerous. But ordinary items

ignition point is generally more than 100 degrees Fahrenheit (130 cotton paper 150 asphalt 250 wood hydrogen sulfide heavy oil castor oil liquefied petroleum gas (LPG) 322 356 300 260 260 350 380 415 methanol gasoline kerosene diesel 463.89 alcohol 510 toluene 553 xylene 553 o-toluene 559 hydrogen 570 benzene 580 ammonia 780). Of course, for safety reasons, it is better to use some heat insulation and fireproof materials, maintain ventilation, and pay attention to temperature and humidity.

FAQ :

1.Are you factory

Yes, we are professional manufacture in Guangzhou and specialized in outdoor aluminum tent for several years.
