What is the fire performance of the industrial warehouse tent?

Can you guarantee the safety of use? The performance of fire prevention is mainly reflected in two aspects, has been the use of profiles, to provide you with the industrial warehouse tent construction structure is 6061-T6 aluminum alloy, the structure is stable and non-combustible, followed by the conventional wall is PVC material tarpaulin, is the most economical of a wall, itself has good flame retardant properties, leave the flame within 2 seconds to see can be extinguished, Weather resistance can reach -20°C~+70°C, safe to use.

The second is the internal configuration of the industrial warehouse, only the complete configuration can timely respond to the occurrence of emergency, we can provide spray pipes, emergency warning signs, emergency lighting, fire extinguishers and other facilities, while the warehouse

management personnel should strengthen management, regular inspection, and have the relevant knowledge of fire fighting measures, in the structure of high-quality profiles, the use of you can be assured.
