New options for enterprise environmental storage:

With the increasing global concern for environmental protection and sustainable use of resources, more and more enterprises and organizations are turning to environmentally friendly and energy-saving storage methods, and the tent is an excellent choice to meet this demand.

The canopy is a versatile and flexible storage solution that is environmentally friendly and energy efficient, making it a sustainable storage option. Tents have a strong flexibility and reusability, traditional storage buildings are usually fixed, difficult to adjust and move, resulting in a waste of resources.

The tent adopts modular design, which can be flexibly assembled and disassembled according to actual needs, not only can adapt to the storage needs of different sizes and shapes, but also can be adjusted and expanded at any time, avoiding waste of resources.

In addition, canopies can be reused between different geographical locations and projects, reducing the need for new construction and thus reducing the land and energy footprint.

Traditional steel structure and reinforced concrete structure of the plant or shelter facilities, need special foundation treatment, cumbersome construction, higher investment, limited approval, site restrictions, and can not be moved.

The tent is a removable mobile building, the use of high-strength aluminum alloy and fire-retardant tarpaulin construction, the overall weight is light, the ground requirements are very low, generally only need to be flat.

The construction is pollution-free, it is moved and dismantled many times according to demand, and some special-shaped sites can even be built following the conditions of the mountain, especially for complex operating sites of industrial and mining enterprises.

How to purchase the tent is more practical?

The copyright belongs to the author. For commercial reprinting, please contact the author for authorization. For non-commercial reprinting, please indicate the source.

Many enterprises in the purchase of tents often hesitate in the purchase and lease, in fact, which way to choose mainly depends on your demand for tents, how long the use cycle of the tent, the number of times the tent is used, if it is long-term or regular use of the tent, buy or more cost-effective, Like some small pointy canopies, the cost of renting four or five times is almost the same as buying, so choosing the purchase method according to the long-term needs of the canopies will save more costs!

Second, according to the activity demand to determine the price of the tent basically no fixed price, the size of the tent specifications, the

selection of materials are not the same, the price is also a big difference, so in considering the price factors to start according to their own tent needs. If it is some simple booths, reception types of tents, the relatively low price of ordinary tents can also meet the requirements. If some commercial exhibitions also require the tent to support the brand, they often use more high-end tents and supporting facilities, or even exclusive tent customization, as well as storage tents have higher requirements for the stability of the tent, to choose better materials and walls, which need to cost relatively high prices. But to meet the needs of the activity of the tent will undoubtedly bring you better results!

If you want to be more practical in the process of using the tent, then you should pay attention to the after-sales service of the tent company when purchasing the tent, determine the date of completion of the tent construction, and ensure that the activities can be held smoothly. And it is best to ask the manufacturer to check and maintain the safety of the tent itself, and also include the maintenance of supporting facilities to ensure that the tent does not have problems in the process of use! The so-called most suitable is the best, according to their own activity needs to purchase the appropriate tent natural most practical! If you want to choose Celt tent, we will not only provide you with the most suitable tent solution, but also provide you with satisfactory after-sales service!

FAQ :
