Product Description

China Professional Large Space Aluminium Alloy Waterproof PVC Field Sports Canopy

1.Description :

Basketball is a very popular sport, because of its own characteristics, the basketball field is a fixed size. The basketball court covers a large area, so many basketball courts choose to be built outdoors. The indoor basketball court is insufficient, and the outdoor basketball court is susceptible to the weather, so how to build a low-cost basketball court that is not affected by the weather? A basketball court roof tent would be a good choice.

Our factory can build a variety of sports court roof tents. Both the span and height as well as the design appearance can be customized. It can fully meet the needs of sports activities such as tennis, football, badminton and swimming.

The roof tent structure of the basketball court adopts Q235 steel structure, which can resist 10-12 strong winds in the outdoors, and the tarpaulin is made of PVDF. At the same time, it has the characteristics of sun protection, waterproof, flame retardant, etc., simple installation and preferential price.

4.If the tent building is applied to the stadium, its advantages are quite obvious:

First: The production process of the tent is very convenient, and it generally only takes 7-15 days to complete from the order to the production.

Second: Easy to build, our tent is a modular building, all the accessories and frames are completed in the factory. Just send the tent materials to the site to start the construction work, our 1000 square tent will take about 1-2 days to build.

Third: Another feature of the tent when it is quickly put into use, our tent can be put into use the next day after the construction of the tent, without considering the existence of harmful substances inside the tent.

Although the tent construction is relatively simple and fast, but also requires a certain amount of technology and experience, taking into account the safety factors when we build or need to find a professional team.
