

Customized Outdoor Stage Truss Aluminum Alloy 6061 Material For Concert Events Display Truss System

Our Product Introduction

for more products please visit us on marquees-tent.com

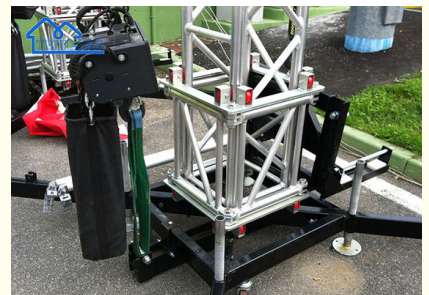

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Truss Frame
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

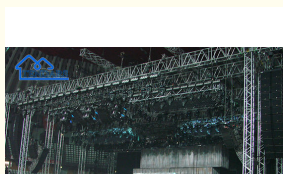

Product Specification

- Product Name: Stage Truss For Concert
- Frame Material: Aluminum Alloy 6061-T6/6082-T6
- Connection Way: Bolt / Spigot
- Length: 0.5m, 1m, 2m, 3m, or Customized
- Shape: Straight, Square, Triangle, Circle, Customized
- Price Term: EXW, FOB, CIF
- Payment: T/T, Western Union, Trade Assurance
- Highlight: Customized Outdoor Stage Truss, Concert Outdoor Stage Truss, Aluminum Alloy concert stage truss

Product Description

Customized Outdoor Stage Truss Aluminum Alloy 6061 Material For Concert Events Display Truss System

Product Description:

Place of Origin
Guangdong, China

Brand Name
OEM,ODM

Model Number
FT-Truss

Product Name
Aluminum roof truss/flat roof truss frames/stage truss for concert

Application
Concert, fashion show, performance,etc.

Material
Aluminum Alloy 6082-T6

Color
Requirements

Adjustable height
0.3-0.5m/0.4-0.6m/0.6-1.2m/OEM

Shape
Square Circle Arch Triangle Ladder Truss

Certificate
CE/SGS/TUV/ISO9001/ROHS

Size
290*290mm/400*400mm/520*760mm

Keywords
Outdoor Concert Stage Truss Project

Packing
Carton

Size	Custom Made
Material	Aluminum
Color	Silver or Black and OEM
Certificate	CE/TUV
Lead time	15-30days
Packing	Air bubble film or carton
Application	Outdoor and indoor,event,exhibitions
Service	24 hours

How to choose a suitable set of trusses?

First of all, the selection of stage truss structure should be considered: the use of the building, architectural modeling, roof waterproof structure, the span of the roof truss, the supply of structural materials, construction technology and other factors as well as the characteristics of various trusses and the scope of application. The truss structure should have reasonable force, advanced technology and economical application.

Second, each kind of truss can play its own role, but the premise is to know and understand the method of construction, hoping to provide you with useful information.

Third, the application of truss structure: civil buildings, industrial buildings, public buildings, recreational facilities, construction equipment, highway Bridges, covering almost all fields of civil engineering. Generally common truss structures are shelved structures, Marine platforms, high-rise buildings and truss Bridges.

Finally, the shelved structure generally refers to a structural system composed of roof truss and columns, which is often used in single-storey industrial plants, and is more suitable for industrial buildings with large span requirements than rigid frame structures. The common forms of shelving are single span shelving, multi-span shelving, equal height shelving, unequal height shelving and zigzag shelving.

Four kinds of building materials :

First, wooden materials in the construction of the event stage, it is essential to use wooden materials, because the various structures of the stage need to be supported by wooden materials, but wooden materials are easy to catch fire, when in use, people need to pay special attention to its fire prevention work, so as to ensure the safety of the activity.

Second, glass materials in the exhibition construction, glass material is also one of the general materials, such as conference rooms, guest reception rooms, media reception rooms of these places the best choice of glass tempered glass, so that once an accident will not hurt people.

At the same time, for safety, you can paste a frosted sticker on the glass or the company's logo waist line. Steel frame structure, including trusses, welded iron shelves, when using these materials must pay attention to its load-bearing capacity.

Fourth, other materials in the event stage construction paint, tarpaulin, carpet, spray painting, engraving text and other materials are essential, in the process of use need to be in accordance with the basic requirements of the standard operation, in addition to the need to pay attention to the environmental performance of the material, the use of cost-effective and other issues.

Of course, the selection of good construction materials plays a certain role in the safety of the booth, but it is also necessary to consider the reasonable design of the booth, the experience of the builder and so on. However, exhibitors can not blindly ask for low prices, which may lead to accidents in the process of exhibiting.

FAQ :

1. Q: Are you a factory?

A: We are a factory.

2. Q: Can you help me to design?

A: Yes, you just need to send us your ideas & requirements about the product.

3. Q: What does your factory do regarding quality control?

A: Quality is priority, we always attach great importance to quality control from beginning to the end.

4. Q: What kind of predominance do you have compared with other suppliers?

1. Competitive price guarantee and 100% quality inspection before delivery stuff.

2. Quick delivery time ---5-10 days in usual.
3. Instant feedback for any inquiry.
4. Possessing experienced designers with perfect craftsmanship to offer you truss design or detailed drawings for your special request.
5. Quality satisfaction guarantee 100% return policy.
6. Small trial order is acceptable. Mixed order support, fast delivery time, and competitive price.
7. Relative merchandises with TUV, SGS certification.
