

Aluminum Stage Truss Outdoor Exhibition Lighting Truss Structure Aluminum Truss

Our Product Introduction

for more products please visit us on marquees-tent.com

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS Coc, CE
- Model Number: Truss Frame
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Stage Frame Truss System
- Frame Material: Aluminum Alloy 6061-T6/6082-T6
- Connection Way: Bolt / Spigot
- Usage: DJS, Events, Exhibition And More
- Application: Custom Sizes
- Color: Silver, black Or As Your Requirements
- Keywords: Outdoor Concert Stage Truss Project
- Hardness: 16 Degrees
- Highlight: **aluminum stage truss outdoor, lighting truss structure aluminum, exhibition truss with warranty**

Product Description

OEM ODM Aluminum Stage Truss Outdoor Exhibition Lighting Truss Structure Aluminum Truss

Product Description:

Product Name	Truss	OEM	Accept
Material	Aluminum	Place of Product	China
Size	Customizable	Feature	Easy to build

What is the difference between TRUSS frame, truss frame and rea frame?

First of all, truss, truss and rea frame are the same in terms of use. They are used for stage construction, the Chinese explanation of "truss" is bundled, a bundle, a bundle, the meaning of the frame, simply put, truss truss can be understood as bundled together the shelf. The Raya frame is named after the invention of LAYHER (Raya) company in Germany.

Under normal circumstances, the rea frame can be used to build a large stage lighting and sound background, etc., and can also build Bridges, large buildings, etc., so it is generally welded in the middle position with a roulette buckle a tube (column), its specifications are much larger than the TRUSS frame specifications. TRUSS frame, also known as aluminum alloy truss, its main features are: light, strong load-bearing capacity, easy handling, neat and beautiful.

Trusses are also called iron trusses, and now trusses generally have their own interfaces, square tube design, and size are also beginning to be common. The truss is mainly used to hang the background jet, which is bulky, easy to rust, high installation and disassembly transportation cost, and is gradually eliminated by the market. Rea stage, buckle stage, insert stage, folding stage, cable-stayed stage. Rea stage is divided into: single bar rea stage and double bar rea stage. Generally speaking, the Rea stage is the most solid and the best stage to bear. The chip stage and the buckle stage are easy to install, but the weight they bear has certain limitations.

How to choose the stage truss for small celebration activities?

What stage truss specifications are required?

Stage part of the main style of the celebration is festive, whether the content of the activity is speech or performance, the stage is an essential platform. From the point of view of construction, folding stage is the simplest, folding stage only need to open the folded stage legs; From the point of view of load-bearing, the assembled stage is more stable, and the assembled stage is linked together by a pull rod, forming a whole between the stages, so the stability is better. Depending on the sales volume, aluminum stage and Rea stage are recommended here. Truss section

As a celebration event, one of the standard is the background frame, the background truss can be made of steel, cost-effective. The trusses have square tube trusses and round tube trusses, and the steel trusses are used in the background. The advertising display screen such as spray cloth is wrapped outside, and the celebration theme is printed. The sound stand uses a round tube aluminum alloy truss, which can be fixed on the aluminum alloy truss if the lighting is required. What kind of trusses are used for stage background trusses and lighting and sound stands are exquisite, and small celebrations are enough to use small trusses.

How to arrange the celebration site, which not only needs to be planned in advance, but also according to the planning to choose the stage truss suitable for the needs of the site, the purchase of products and the construction of the site, there must be a system program. If the celebration wants to achieve the desired effect, in addition to these, it also needs to expand the rich content, which is the core of the celebration.

FAQ :

Q1: Can you do custom design?

A: We can. We have a professional team of engineers who can provide you with any design.

Q2: What certificate do tendars stage have?

A: TUV/CE/ROH Certification.
