

LED Stage Lighting Control Boards Consoles 110V 220V 50Hz 60Hz

Our Product Introduction

for more products please visit us on marquees-tent.com

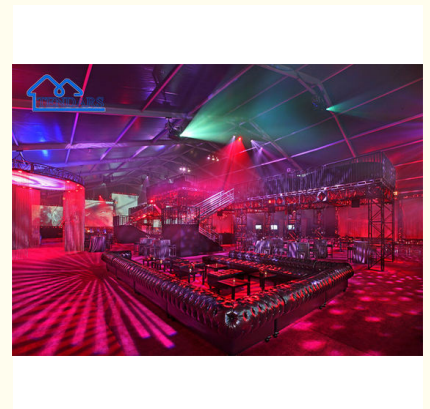

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: CE ROHS
- Model Number: Control Board
- Minimum Order Quantity: 10piece
- Price: Reconsideration
- Packaging Details: Logo Printing is Acceptable. Customized Package is Acceptable.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000pcs per Month

Product Specification

- Product Name: Control Board
- Application: Control Lights
- Voltage: 110V, 220V 50/60Hz
- Input Signal: -20°C~60°C
- DMX Channels: Control 6CH At The Same Time
- Dimming: 0-100% Electronic Dimmer
- Power Required: 12 DVC 300 Ma
- Product Weight (kg) : 4.5
- Highlight: stage lighting control boards 110V ,
stage lighting control boards 220V ,
stage lighting consoles 60Hz

Product Description

LED Professional Stage Lighting sound activated Moving Head Control Board Dj

Product Description:

Lighting solutions service	Lighting and circuitry design
Luminous Efficacy(lm/w)	10
Product Weight(kg)	0
Max. Load Power	220V
Voltage	AC 100-240V
Package	Flight Case
Application	Control Lights
International standard signal output	
LED liquid crystal display	
Control 12 16 channel computer lights	
8 channel push rod	
1 walking lamp speed push rod	
1 Gradient push rods	
1 set rocker devices	
12 lights program, the maximum 20 steps per program	
240 computer lights go on the light program step	
International standard signal	
Input MIC sound control input	

Why choose us ?

Leading Manufacturer of LED Controller

12 Years Experiences for LED Controllers

Cooperates with 200+ Global Customers in 50+ Countries

One Stop Supplier for LED Strip Accessories

LED Controller, Flex LED Strip, LED Strip Connector

Saving Your Supplier Chain Managing Cost.

Fast Shipping Time

24 Hours for Samples

7 Days for Production

The most Competitive Price in the Market

100% Materials Stocked in warehouse

50+ Types Regular Products Stocked in warehouse

Free replacement

Free replacement for defected products in Quality Guarantee Period

When selecting LED stage screen, the following aspects should be considered:

1. The selection of screen body LED stage screen consists of main stage screen, secondary screen, and expansion screen. The role of the main screen is live broadcast and wonderful playback, generally choose a high-definition rectangular LED display, the point spacing is generally within P6, the larger the area, the better, so that the scene on the stage can be smoothly displayed in front of the audience. The two sides of the main screen will be configured with several sub-screens, the sub-screen can choose a special shape of creative LED display, like S-shaped curved screen, LED flexible screen, LED cylindrical screen and other special-shaped screen. If the budget is limited, the side screen can also choose to use a lower cost screen. Stage video expansion screen is generally used for super large stage, concert, etc., to take care of the rear audience, so that all the audience can clearly see everything on the stage.

2, the choice of control system Under normal circumstances, the LED stage screen area is relatively large, high pixel, the number of points required to send the cassette is high, and sometimes a number of control cards are required for cascading splicing control. If we want to display the effect better, we usually need to use the video processor, so that the video can be spliced and cut, to achieve multi-window, picture in picture, scalability, video effect is more delicate and smooth.

3, the selection of box structure due to the particularity of the LED stage screen, the general use of standardized box structure, easy to disassemble, light weight, convenient transportation. The box is light, can be quickly installed, dismantled and transported, suitable for large area rental and fixed installation applications. In summary, we can see that the selection of LED stage screen to consider the screen body, control system, box structure and other three aspects, as long as these aspects are met, you can ensure that the LED stage screen you choose can be suitable for the use of the stage, so as to provide a rich performance stage background, the lifelike picture and the shock of the music effect perfect combination, Create a grand and modern spectacle that creates an immersive feeling and subverts the traditional visual experience.

FAQ :

1. who are we?

A Manufacture Leading LED Controller with 12 Years Technical Service for 200+ Global Customers in 50+ Countries

2. how can we guarantee quality?

Always First Article before mass production. Always Final Inspection before shipment;

ISO9001:2015 Certificated

Free Replacement

3.what personalization we offer?

Custom Function includes Circuit Design, Mechanical Design

Custom APP includes Firmware, IO and OTA.

4. what is our customer complain process?

Failure Analyse, Find the Root Cause

Replacement
