Finish	Custom	Metal /crystal /glass finish can be customized per your requirement.
Color Temperature	Warm white 3000K/Daylight 4000K (Default warm white,please leave a message if you want different color.) UL/CE/SAA	-
Voltage	110V-240V	-
Usage	staircase chandelier used for:stairs, Lobby, living room.	-
Sample	Material & metal finish sample	Sample is free, you just need pay for freight.
Design drawing	Professional project drawings	More project consultation, pls contact me

How to choose a crystal chandelier?

Crystal glass & Glass As one of the most common lighting materials, crystal glass and glass are often widely used in the decoration of lamps.

Crystal glass is ordinary glass containing lead, adding lead to the glass can increase the refraction efficiency of the glass to light, making the light more brilliant, crystal clear, but also reduce the hardness and plasticity is stronger.

In the sensitive glass and crystal glass have similarities, but in the light, the refractive index of crystal glass is not comparable to glass, so the price of glass and crystal lamp is very large. How to distinguish crystal glass from glass?

Look: Rotate the crystal glass to the light, crystal clear, and reflect the charming colorful light, ordinary glass is very different, the color will also appear dirty and dark.

Smell: Tap lightly or flick with your fingers. Crystal glass can emit a crisp metal sound, and the sound of ordinary glass is relatively dull. Q: Ask about the crystal brand or crystal material used by the merchant.

Cut: The weight of the same volume of crystal glass and ordinary glass is greater, higher crystal glass will make you feel calm, heavy hand feel, the same ordinary glass is lighter.

Common crystal glass for crystal lamps: Austrian crystal Egyptian Asfa crystal K9 crystal Ordinary material crystal affects the refraction of crystal glass is not only the material itself, its cutting process, polishing, drilling is also crucial.

Crystal lamp, not only the choice of good crystal glass, the material and process of the lamp body are equally important, otherwise in the beautiful crystal with a black lamp body, the grade will be instantly pulled to the ditch.

The material of the lamp body is mostly iron or all copper, but since the choice of crystal lamp, try to choose all copper + crystal, whether it is texture or grade is unmatched by iron lamps.

Note to buy crystal chandelier:

1, meet the requirements of environmental protection, now more and more people are advocating environmental protection, indicating that environmental protection is also recognized by more and more people. You can imagine if the health of the person can not be guaranteed, there is no way to talk about comfort and beauty.

2, meet the requirements of decorative functions.

3, should conform to the overall design idea. When the decoration style and the overall idea are settled, we know what kind of materials we need, and we will purposefully look for materials suitable for ourselves.

4. Cost performance. The purchase of decoration materials should be combined with their own economic conditions, to try to control the budget.
