There are slots on both sides of the aluminum alloy frame to facilitate the passage of strips on the pvc cover

There are slide buckles on the side wall pvc cover, so we can pull it aside or take it down, there is a zipper in the middle of each

side wall cover, when it is closed, it can be used as wall, conversely, it will be used as door

Parts details :

□

Structural system

The main material is aluminum alloy profile GB6061-T6 / AL6082-T6. The support between the columns is reinforced with diagonal steel tubes. The length distance between the columns can be divided into 5 meters or 3 meters indefinitely. The overall structure has passed the wind test of a professional institution. The maximum allowable wind speed is DIN EN 13782: 102 km / h (0.50kN / m).

□

Roofing system

The roof is made of excellent double-sided PVC coated synthetic fiber cloth material. The tarpaulin has strong anti-corrosion, anti-mildew, anti-ultraviolet and flame retardant properties, and the flame retardancy is in accordance with DIN 4102 B1, M2; BS7837 / 5438; American NFPA70, etc. have reached international standards. The longest service life of tarpaulin is 10 years.

□

Base System

The tents have no special requirements for the construction site, and generally flat grounds such as sand, grass, asphalt, cement and tile floors can be safely used. It is suitable for rapid installation or disassembly in different environments. It has good flexibility and safety. It can be widely used in outdoor activities, commercial exhibitions, festivals, catering and entertainment, industrial storage, sports venues and so on.
