Features	Water Proof, UV Resistance, Fire Retardant(DIN4102,B1,M2)
Application	Wedding, Party, Event, Exhibition,etc
Accessories	Drapery, Air Conditioner, Heater, Floor, Window, Curtain, Lighting etc.

Uses of church tents:

Worship Services: Church tents can serve as temporary places of worship, providing shelter for congregants during religious services, prayer meetings, or special ceremonies.

Outdoor Events: Many churches use tents for outdoor events such as outdoor weddings, baptisms, picnics, or community outreach programs. **Expansion or Renovation:** Some churches use tents during construction or renovation of their permanent buildings to ensure that services and activities can continue without interruption.

Seasonal Events: Tents are commonly used during holidays and special seasons, such as Christmas or Easter, for nativity scenes, live reenactments, or festive celebrations.

Youth and Children's Programs: Tents can be used for youth group meetings, children's programs, and educational activities, providing a versatile and flexible space for various church-related activities.

Community Outreach: Church tents are often used for community outreach programs, including food drives, medical clinics, and counseling services. They can serve as a welcoming space for the community to access various resources.

Revival Meetings: Tents are frequently used for revival meetings or evangelistic crusades, where large numbers of people gather for religious purposes.

Temporary Shelter: In emergency situations or disaster relief efforts, some churches use tents to provide temporary shelter and assistance to those in need.

Different Sizes :

Tent Size(m)	Side Height(m)	Frame Size(mm)	Floor Area(m ²)	Capacity
10x20	3	120x48x3	200	150-200 Peoples

20x30	4	112x203x4	600	500-600 Peoples
30x50	4	112x203x4	1500	1200-1500 Peoples

Working process :

Automatic cutting

The tarpaulin of the conventional tent adopts a large CNC numerical control machine tool imported from Germany to automatically cut and cut the tarpaulin accurately.

Manual cutting

According to the drawings, the tarpaulin of the large-scale tent is first drawn and drawn, and the cutting method is manually cut according to the drawings.

High frequency welding press

The tarpaulin welding machine imported from Germany can guarantee the high quality of each batch of goods. The tarpaulin welding technology has been highly recognized by international professionals.

Cut out

The tarpaulin needs holes to fix the tarpaulin on the tent support, and uses high-quality copper metal stamping holes.

Automated packaging

After the tarpaulin processing is completed, each batch of goods is manually inspected. After the inspection is complete, it is packaged with automated equipment.

Bracket processing

The tent support processing adopts a large CNC numerical control machine imported from Germany to ensure that the precise tent support screw holes are processed with a positive and negative difference of $\pm 0.01\text{mm}$ in size.

Customizable :

There is also a very important advantage of the tent, that is, it is customizable. Whether it's an exhibition, a wedding, a concert or a sports meet, the needs of each event are different. The exhibition tent can be flexibly customized according to specific needs, such as different sizes, different shapes, different colors, etc., to meet the needs of different occasions.
