Sport tent structure :

1, modular structure, prefabricated in the factory, transported to the site quickly assembled and constructed, the site does not need welding; The main material is (aluminum alloy frame, PVC film canopy top cloth, hard wall around);

2, foundation treatment, the foundation treatment of the tent is relatively simple, but it should also be customized according to the situation, and can not be generalized. Such as the use of the environment, the planned service life, the ground situation, there are also many built on the roof. More common

(C20 concrete ≥150mm, direct ground explosion or chemical anchors;

Embedded parts, pouring concrete;

Ring beam;

Play 850mm-1200mm steel).

At the same time, pay attention to the process of making the ground waterproof.

What are the advantages of indoor football tents?

The indoor football tent is a temporary building with simple approval.

As a sports tent stadium school special sports tent all the components are produced in the manufacturer, to the site only need to be simple installation, the tent building is spliced assembly, 1000 square meters in a professional team can be installed in place in a day.

Indoor football tent on the field requirements are almost zero, you can on the lawn, cement ground, asphalt ground can also be built on the roof of our sports tent stadium school special sports tent. Sports tents The cost of sports tents dedicated to schools is cheap and environmentally friendly.

The canopy can be dismantled and reused repeatedly. Sports tent stadium school special sports tent in accordance with the requirements of different sports can be customized not only can do sports tent stadium school special sports tent can also do badminton, football, swimming pool, tennis tent and so on

More about sport tent :

First of all, the temporary basketball tent can build a span of 3-80 meters, the length is not limited, the height can be customized, the use of aluminum alloy as a frame and PVC material tarpaulin composition, the structure is stable and can be rain, mold and flame retardant, for tarpaulin is also a choice of different colors.

And the temporary stadium canopy puts safety in front, specially wrapped the base, which greatly saves cost and time compared to the traditional stadium, and uses a lot of cushioning to avoid children tripping or bumping. It is also guaranteed in terms of safety performance.

The commonly used fixing methods of the stadium tent are expansion bolts, net basket bearing, steel, which can be adjusted according to different ground, without causing irreparable damage to the ground, and it will be restored as before after removal.

The tent gymnasium can accommodate a variety of sports: gymnastics, table tennis, volleyball, basketball, tennis, badminton, squash, handball, swimming, futsal, etc.
