6M	28.26	62.172	3.6
7M	38.46	84.61	4.2
8M	50.24	110.52	4.8
9M	63.58	139.87	5.4
10M	78.5	172.7	5.5

What size is needed and does the site have enough space?

The 6-meter diameter star tent is suitable for couples or small families, while the 7-meter, 8-meter diameter dome is suitable for families or groups. The way to determine if a site has enough space is simple. Stand roughly in the center of where you want to place your starry tent.

Hold one end of the tape measure, ask your friend to hold the other end of the tape measure 3m length (7 meters please measure 3.5 meters length), and then ask your friend to circle around you, if you can complete a circle without any obstacles, then this position can meet the space of the starry tent.

To build the infrastructure of the site :

The beautiful natural scenery is relatively remote, and the infrastructure of the construction site is also a problem that you need to focus on. The starry tent room can be equipped with a standard bathroom, equipped with a sink, toilet, shower room and hot water supply system, and the site needs to access water and electricity and other infrastructure.

Orientation - In what direction is the landscape of the construction site?

A major feature of the luxury Star tent hotel is that it has a large transparent viewing surface, which can enable guests to enjoy the beauty of nature inside the tent. It is recommended that you Orient the viewing surface of the Star tent towards the scenic area of the construction site, so that guests inside the tent can get a good experience. ,

The ground environment of the construction site

The existing ground environment of the site determines the cost of your investment in the bottom foundation of the tent hotel. Generally, the bottom of the starry tent will be supported by a steel frame platform, and then a layer of anti-corrosion wood will be laid, and then the tent will be installed above the anti-corrosion wood.
