

6061/T6 Aluminum Frame 12m Dia Glamping Hotel Tent PVC Canvas En-Suite Bathroom for Luxury Resorts

Our Product Introduction

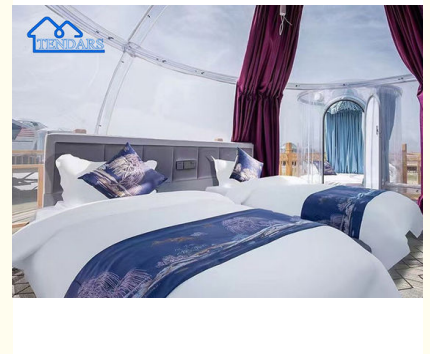

Basic Information

- Place of Origin: Guangdong , China
- Brand Name: Tendars
- Certification: ISO9001, SGS Coc, CE
- Model Number: small tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

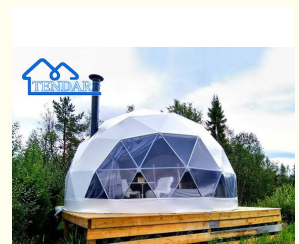

Product Specification

- Features: UV-resistant/Fireproof/Waterproof
- Product Name: Igloo House Dome Glamping Tent
- Frame Material: Galvanized Steel Structure
- Cover Material: Double PVC-coated Fabric, waterproof, fireproof, sunproof
- Color: Custom Colors
- MOQ: 1 Set
- After-sale Service: Online Technical Support
- Outside Tent Waterproof Index: 2000-3000 Mm
- Highlight: **6061/T6 aluminum glamping hotel tent, 12m dia PVC canvas tent, luxury resort en-suite bathroom tent**

Product Description

Aluminum Frame Glamping Geodesic Dome Tent For Outdoor Travel Roof Top Tent Glamping

Product Parameter :

item	value
Warranty	More than 5 years
After-sale Service	Online technical support, Onsite Installation, Onsite Training, Onsite Inspection, Free spare parts, Return and Replacement
Project Solution Capability	graphic design, total solution for projects
Application	Outdoor
Design Style	Modern
Place of Origin	China
Sheet Color	Clear, Dark Blue, Milk Whitel, Brown, Lake-blue, Green
Life Span	10+ years
Diameter	2.7/ 3.3/ 3.8/ 4.2 * 3.3m
MOQ	1 set
Technology	Extrusion
Application	Hotel, Villa, Leisure Facilities, Park
Style	Leisure
Feature	Quick installation, UV protection, breathable

What is the starry room / tent ?

Starry room, also known as bubble room, refers to a non-traditional prefabricated building with PC board as the panel and aluminum alloy frame as the skeleton, 360° full transparent experience, modular quick installation, flexible splicing combination, and can be used in multiple scenes.

The so-called PC board is a high-performance engineering plastic - polycarbonate processing, harmless, with high transparency, light material, impact resistance, sound insulation, heat insulation, flame resistance, strong plasticity, anti-aging and other characteristics. It is a commonly used industrial plastic and building material. Baby bottles, chandeliers, trains, car dashboards, etc., are made of PC material. Compared with traditional buildings, the star room is flexible to disassemble and is not illegal.

The star dream star room as the industry's first to launch the star room source manufacturers, the use of German imported PC plate, engaged in the PC plate industry has more than 10 years of experience, and its anti-strike ability is strong, hammer hard hit not broken, the police explosion-proof shield used the material.

The starry sky room made of PC plate has a service life of about 15-20 years, and if yellowing and cracking occur within 10 years, it will be replaced free of charge. And there is a UV coating on the surface of the PC board, which can fully block ultraviolet rays, do not worry about tanning and protect the interior furniture.

Due to the characteristics of its own material, the starry night room has reached B1 level fire retardant effect, which greatly reduces the fire hazard, and can realize self-extinguishing within 15 seconds from the fire. And the installation and disassembly is fast, easy to clean, and can be washed with high pressure water gun.

The interior of the Starry night room can be installed with air conditioning, heating, and some are also equipped with gold and steel mesh, which allows users to use in all seasons and enjoy warm winter and cool summer.

Is the star tent hot in summer?

1. Advanced heat insulation technology

In the design and construction process of star room, insulation is one of the key links. Starry Night Room adopts advanced heat insulation technology, selects efficient heat insulation materials, and adds anti-UV coating, which can effectively resist ultraviolet rays to reduce the introduction of external heat. This helps to block the outside high temperature in the summer, keeping the indoor temperature within a relatively comfortable range and avoiding the feeling of sultry.

2. Intelligent ventilation system

In order to solve the ventilation problem in summer, the starry Night room has integrated an intelligent ventilation system into the design. Through scientific and reasonable ventilation design, indoor and outdoor air can be well circulated to ensure fresh indoor air and reduce indoor temperature. The occupants are free to adjust the ventilation system as needed to stay comfortable during the hot summer months.

3. Applicable environmental control facilities

The Starry Night Room can also be equipped with advanced environmental control facilities, including air conditioning, fans, etc. These facilities can be adjusted according to the needs of the occupants, ensuring that the indoor temperature can be maintained during hot weather. At the same time, these facilities can also effectively eliminate indoor humidity and reduce the feeling of sultry.

4. Adjustable shade measures

In the summer, strong sunlight may raise the temperature of the room. To solve this problem, we introduced adjustable shading measures such as curtains into the design of the star room. These measures can not only block the sun, but also reduce the indoor temperature, providing a cool and comfortable living environment.

5. Comprehensive consideration of climate characteristics

The climate of each region is different, so we have taken the climate of the location into account when designing the star room. We are committed to providing the most suitable solutions for residents in different regions to ensure that they can still enjoy a comfortable living experience during the summer.

FAQ :

1.Q: Is it difficult to build a prefab house?

A: Totally not, you can build the house independently according to the construction drawings as long as you know how to use an electric tool.

2.Q: Does this kind of house can only be used in residential buildings?

A: Absolutely not. It can be used in all kinds of buildings, such as hotel, office, school, entertainment club, light industrial workshop, etc.

3.Q: Is prefab house stable?

A: Set your hearts at rest! You are completely safe living in light steel prefab house even if there are hurricanes of 200km/h and 9-grade earthquake outside.
