

Breathable Big Transparent Geodesic Dome Tent With Steel Frame Affordable Luxury Tents

Our Product Introduction

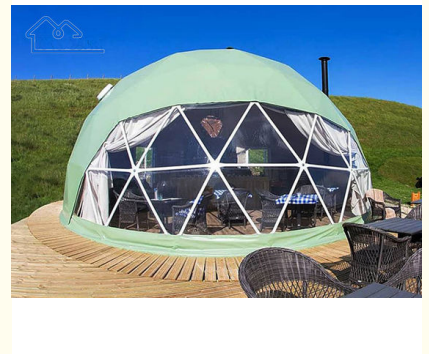

Basic Information

- Place of Origin: Guangdong , China
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: small tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

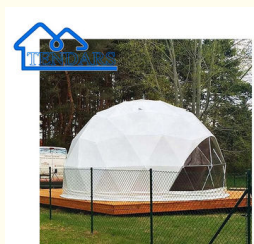

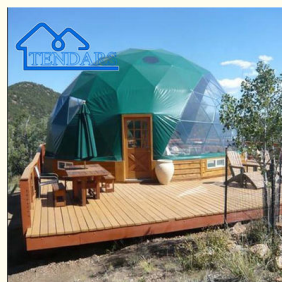

Product Specification

- Features: UV Resistant
- Product Name: Glamping Tents With Steel Frame
- Frame Material: Galvanized Steel Structure
- Cover Material: Double PVC-coated Fabric, waterproof, fireproof, sunproof
- Color: Custom Colors
- Space: Interior Space
- After-sale Service: 7/24 ON LINE
- Usage: Outdoor Display
- Highlight: **Big Transparent Geodesic Dome Tent, Breathable Transparent Geodesic Dome Tent, Steel Frame transparent dome tent**

Product Description

Breathable Big Transparent Geodesic Dome Tent With Steel Frame Affordable Luxury Tents

Product Parameter :

item	value
Warranty	More than 5 years
After-sale Service	Online technical support, Onsite Installation, Onsite Training, Onsite Inspection, Free spare parts, Return and Replacement
Project Solution Capability	graphic design, total solution for projects
Application	Outdoor
Installation	Easy Installation
Place of Origin	China
Sheet Color	Clear, Dark Blue, Milk Whitel, Brown, Lake-blue, Green
Warranty	5 years
Diameter	Customizable
MOQ	1 set
Technology	Extrusion
Application	For Hotel/ Outdoor/ Garden/Restaurant/ Cafe/ Resort
Style	Leisure
Feature	Quick installation, UV protection, breathable

Which material of star room is better?

At present, the main materials of starry rooms on the market are acrylic, PVC and PC sheet material. Compared with acrylic material, PC sheet star room is more difficult to break. PC material impact is strong, durable, can resist projectiles and all kinds of sharp instruments and acid object attack. The police explosion-proof shield is made of PC plate. And the impact strength of the PC anti-riot endurance plate is 30 times that of acrylic of the same thickness, and it has the reputation of "non-breaking glass" and "ringing steel".

The PVC star room in the sun for a long time under high temperature exposure is easy to age, yellow, and has a certain harm to the human environment, but the PC material star room even in the sun exposure is not easy to age, yellow, and non-toxic and harmless.

At present, according to market research, the sky sky room occupies 70% of the market share, the sky sky room as a source manufacturer, has more than 10 years of experience in the PC plate industry, and the use of imported PC raw materials from Germany, plus imported equipment from Israel, making the product delivery capacity is strong, can be mass-produced more than hundreds of sets per day, can be delivered from the spot.

In the case of efficient production, the quality is guaranteed, the service life can reach 15-20 years, the warranty can be up to 10 years, during this period, the occurrence of yellowing, cracking and other problems can be replaced.

In addition, the light transmittance of Starry Dream starry room is as high as 95%, which can be comparable to glass, and can provide one-stop customized solutions for starry room, modular assembly, and installation can be completed in 2-3 hours.

Of course, because of the long-term outdoor placement needs care, there is no need to worry about care, and the use of high pressure water gun can be simply sprayed. In order to avoid windy weather, the Sky Dream room adopts a circular dome design, this design does not ride, greatly reduces the wind resistance, can resist 12-14 typhoon, and at the bottom is also reinforced, making the sky Dream room more stable, in the "Sky Dream" application case experienced 12 super typhoon, but still safe.

PVC&PC :

We can see from the material, the current market in the name of the star room materials are mainly PVC and PC materials.

The two materials have their own advantages, PVC price is slightly lower, beautiful appearance, but the use time is short between 2-3 years, if placed outdoors by long-term exposure to the sun, easy to emit odor, and easy to be scratched by sharp things, and need to be inflated all the time, safety is not high.

PC material star room exactly to avoid the shortcomings of PVC star room, PC star room that will not be in the sun for a long time under the odor, will not be easily scratched, adults with an axe to smash are not broken, police explosion-proof shields and aircraft Windows are using PC material. And the use time of PC sheet star room can be as long as 15-20 years, you can do wind, rain, seismic and sound insulation, but compared with PVC star room a little more expensive.

FAQ :

1.Q: Is it difficult to build a prefab house?

A: Totally not, you can build the house independently according to the construction drawings as long as you know how to use an electric tool.

2.Q: What documents are available?

A: A full range documents drawings, packing lists, installations manual and relatives certificates can be provided. Customs declaration is provided. We provided one-stop service for you.

3.Q: Is your tent strong and stable enough? How about the wind loading?

A: Yes. The main frameworks (upright support and roof beam) are manufactured with Galvanized Steel Structure. So our tent structure is safe and strong and can be resist wind speed up to 100 km/hr.
