Several tent types:

1. The herringbone canopy, as the name suggests, is an A-shaped canopy with A large area suitable for various large-scale activities. Outdoor temporary exhibition hall, indoor/outdoor special exhibition booth, temporary exhibition hall, VIP lounge, reception center, news center, lecture hall, conference room, product tour exhibition, new product launch, publicity exhibition, etc.

2, pointed canopy room Pointed canopy room can help you show the infinite creativity of outdoor activities, highlight the noble and elegant outdoor activities, improve the quality of your outdoor activities, Raise your outdoor profile! The pointed canopy room can choose the commercial square with large traffic in the city, can be in the hotel side, can be on the lawn, or can be on the beach, the lake side, the garden of the suburban villa, the golf course, their own back garden, or the scenic park and other places.

3, combined awning

Combined awnings owners if according to the needs of users to combine several types of awnings together, usually polygonal awnings and pointed awnings mixed together to form a variety of special shape of the awnings, the shape is more chic, bring better visual effects, often used for high-end gorgeous outdoor activities.

4. Spherical canopy

Spherical tent is the current tent industry's new favorite, known as "the strongest space, the lightest weight, the most effective design", its functional use is quite extensive, like the application of ordinary tent: wedding, parties, festivals, exhibitions and other outdoor activities can be competent, and its unique and beautiful shape, changing tarpaulin design style, more popular with consumers!

Structure :

Frame part:

1. The main frame is mainly based on high-strength aluminum profiles, and the connecting part is mainly based on iron parts treated by hot-dip galvanizing.
2. There are two kinds of surface treatment of aluminum profiles (oxidized or fluorocarbon paint), and the surface treatment of iron parts is all hot-dip galvanized.

Fabric :

- 1) : Top cloth and cloths are mainly made of PVC made of high-strength polyester filament after double layer processing.
- 2) : The main functions of the tarpaulin are waterproof, fireproof, anti-ultraviolet, and self-cleaning.
- 3) : Fire rating: B1 level (equivalent to the international standard M2) (flame retardant, three seconds from the fire self-extinguishing) with relevant certificates.
- 4) : Tent specifications are: 600g/m2, 650g/m2, 750g/m2, 850g/m2, 900g/m2 and so on.

Optional supporting facilities:

- 1) : Transparent PVC window 2) : ABS hard side wall 3) : steel
- 4) : Glass curtain wall system 5) : rain sink; 6) : top mantle and enclosing mantle
- 7) : Floor system 8) : glass door 9) : sandwich panel wall or single colored steel wall

Tent functions:

- 1) : Simple and convenient to build and dismantle.
- 2) : The demolition of the tent occupies a small space for storage;
- 3) : There is no pillar inside the tent, and the space utilization rate is 100
