

Aluminium Arcum Tents , Heavy Duty Commercial Tents For Events

Our Product Introduction

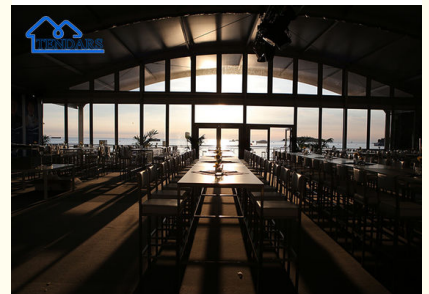

Basic Information

- Place of Origin: Guangdong , China
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Premium Aluminium Arcum Tent
- Frame Material: High Strength Aluminium Alloy Profile
- Roof Cover: 850g/sqm PVC Fabric
- Flame Retardancy: DIN4102 B1/M2
- Length: Customized, Standard Bay Length 3m Or 5m
- Season: Four-season Tent
- Colour: White, Red, Blue, Transparent, Ect
- Application: Party, Event, Exhibition, Wedding, Sports, Warehouse, Garage, And Etc
- Highlight: **Commercial Arcum Tents,
Arcum Tents Heavy Duty,
Events Heavy Duty Commercial Tents**

Product Description

Premium Aluminium Arcum Tent Heavy Duty Commercial Structure Tents For Events

Product Parameter :

Product name	Arch Roof Top Tent Outdoor Commercial Event Tents
Main frame	Hard pressed Aluminum Alloy T6061/T6
Surface treat method	Hot dip galvanized
Tent roof fabric	850g/sqm PVC coated polyester fabric
Sidewall fabric	Soft PVC fabric, ABS wall or glass wall
Wind load	100km/h or customized
Features	Water proof, UV resistance, fire retardant(DIN4102,B1,M2)
Warranty	Aluminum frame for 20 years, PVC fabric for 8 years.
Application	Wedding, party, event, ceremony hall and so on

What's the arc tent ?

Arc tent is also what we often say arc tent, mainly evolved from the classic chevron tent, the end of the "A" deformation into a curved line, the overall look is very smooth, far like a beautiful rainbow house. To put it simply, the curved canopy is an extension of the conventional canopy, which has the advantages of beautiful appearance and diversification, and safe and stable structure.

The arcum tent uses high-quality aluminum alloy profiles as the frame, beautiful appearance and corrosion resistance, and the service life is not less than 20 years. The external tarpaulin is made of double-sided coating PVC cloth with sunscreen and flame retardant, with wind and rain resistance, self-cleaning and other functions, which can save a sum of maintenance costs and is very economical.

Advantage :

- Flexible detaching and relocation
- Easy to assemble and disassemble, short construction period for putting into use
- Repeatedly built and used -Low construction cost with no foundation treatment needed
- Equipped solution with security system, power supply, heating system, ventilation and other ancillary equipment.
- Convenient transportation and storage

A frame tent & Arcum tent :

Arcum tents and A-frame tents are two different types of tent designs, each with its own characteristics and advantages. Here's a comparison of the two:

Shape:

Arcum Tent: Arcum tents have a curved or semi-circular roof design that resembles a traditional building. This curved roof provides more interior space and height compared to A-frame tents.

A-Frame Tent: A-frame tents have a triangular roof shape that forms an "A" when set up. They have sloping sides that meet at a central peak. A-frame tents tend to have less interior space and headroom than arcum tents.

Interior Space:

Arcum Tent: Due to their curved design, arcum tents offer more usable floor space and greater headroom throughout the entire tent. They are often used for events, exhibitions, and weddings where a spacious interior is needed.

A-Frame Tent: A-frame tents have sloping sides, which can limit the usable space, especially near the edges. They are typically smaller and may not be as suitable for large gatherings.

Stability:

Arcum Tent: Arcum tents are known for their stability and ability to handle various weather conditions, including heavy rain and snow. The curved design helps distribute wind and snow loads more evenly.

A-Frame Tent: A-frame tents are generally less stable in extreme weather conditions. They may not be as suitable for situations where wind and snow loads need to be considered.

Setup and Portability:

Arcum Tent: Arcum tents often require more time and effort to set up due to their larger size and more complex frame structure. They may not be as portable as smaller tents.

A-Frame Tent: A-frame tents are relatively easy to set up and take down, making them a good choice for camping and other outdoor activities. They are more portable than larger arcum tents.

Intended Use:

Arcum Tent: Arcum tents are commonly used for events, trade shows, weddings, and other gatherings where a spacious, elegant interior is desired. They are also often used as semi-permanent structures.

A-Frame Tent: A-frame tents are popular for camping, backpacking, and smaller outdoor events. They are more suitable for recreational purposes.

In summary, the main differences between arcum tents and A-frame tents lie in their design, interior space, stability, setup, and intended use. The choice between the two will depend on your specific needs and preferences, as well as the intended use and environmental conditions.
