Application	Outdoor events / camping / party events
Side wall	PVC wall
Snow load	80-100kg/sqm
Wind load	100km/h
Certification	ISO 9001:2008 / SGS / CE
Space	100% available space
Option accessories	Glass door /Ventilation windows /Insulation / Skylight / Solar fan etc

Common dome sizes:

Spherical canopies can vary in size according to need, and manufacturers usually offer a variety of options in different sizes to suit different uses and space requirements. Here are some examples of common dome sizes:

Diameter:

Small spherical tent: Usually between 15 feet (about 4.5 m) and 30 feet (about 9 m) in diameter. These sizes of tents are suitable for small events, outdoor parties, picnics, exhibitions, etc.

Medium spherical canopy: Usually between 40 feet (about 12 meters) and 60 feet (about 18 meters) in diameter. These medium sized canopies are suitable for medium sized weddings, music festivals, exhibitions and banquets.

Large spherical canopy: Diameter can be more than 60 feet (about 18 meters). These large canopies are often used for large events, exhibitions, commercial purposes and large banquets.

Height:

The height of a spherical canopy is usually proportional to its diameter, but can be adjusted as needed. In general, the height of the tent will peak at the highest point in the center, and then gradually reduce to the side walls.

Seating Capacity:

The seating capacity of the canopy depends on its diameter and design. Small spherical canopies can usually accommodate dozens to a hundred people, while large spherical canopies can accommodate hundreds or more.

Purpose:

Spherical canopies can be used for a variety of purposes, from small family gatherings to large public events. The choice of size usually depends on the requirements of the particular activity.

It is important to note that these sample sizes are for reference only and actual spherical canopy sizes can vary by manufacturer and supplier. When choosing a canopy size, you should consider your type of event, the expected number of participants, space requirements, and the space available at the venue. It is best to work with a canopy manufacturer or supplier to get the specific size and customization options that meet your needs.
