Product Description

Clear Span Event Outdoor Wedding Tents Aluminium Alloy PVC Marquee Tent Renting Tents For A Wedding

Product Specification:

Models	TDS-T110
Span Width	30m
Ridge Height	8.8m
Longest Component	10.5m
Side Height	4m
Roof Pitch	18°
Bay Distance	5m
Length	50m
Main Profile	300X125X6mm/350X125X8mm aluminum alloy
Frame Material	High reinforced aluminum, anti-rust surface, GB/T 6061-T6 standard, Surface oxidation; Film thickness > 10µm
Fabric Material	850g/m ² double PVC-coated polyester, flame retardant, UV resistance, waterproof, comply with DIN 4102 B1, M2 (German standard), Applicable temperature range: -30°C to +70 °C
Connection Part	All steel parts are galvanized steel, hot-dipped and not easily rusted, and all come with rust prevention process.
Maximum Wind Limit	80 ~ 100km/h
Eave Connection	Clip-fix style
Reinforce Method	Cross-fix

why wedding marquee tents are considered versatile :

Location Flexibility: Marquee tents can be set up in a wide range of locations, both indoors and outdoors. This versatility allows you to choose a wedding venue that holds personal meaning or fits your vision, whether it's in a garden, on a beach, in your backyard, or even in an urban setting.

Size Customization: Marquee tents come in various sizes and configurations, making them suitable for both small, intimate weddings and large, grand celebrations. You can choose a tent size that matches your guest list and requirements.

Customizable Design: The design of marquee tents is highly customizable. You can choose from different styles, colors, and decorative elements to create a unique atmosphere that suits your wedding theme and personal taste.

All-Weather Use: Marquee tents are designed to withstand various weather conditions. They provide shelter from rain, sun, wind, and even snow, making them suitable for weddings held year-round.

Multi-Functional Spaces: Marquee tents can be used for various wedding-related activities, such as the ceremony, reception, cocktail hour, and more. You can divide the space into separate areas for different purposes.

Lighting Options: Marquee tents often come with options for lighting, including chandeliers, fairy lights, and LED lighting. You can create different moods and atmospheres with lighting, enhancing the versatility of the space.

Decoration and Theme Adaptability: Whether you want a classic, rustic, modern, or themed wedding, marquee tents can be easily adapted to match your desired aesthetic. You can decorate the interior to reflect your chosen style.

Quick Assembly and Disassembly: Marquee tents can be set up relatively quickly, making them suitable for short-notice weddings or last-minute changes in plans.

Transportability: If you decide to have a destination wedding, marquee tents can be transported to your chosen location, giving you the freedom to celebrate in your dream destination.

Accessories and Add-Ons: You can add accessories and enhancements to marquee tents, such as flooring, air conditioning, heating, and clear sidewalls, to tailor the space to your specific needs and the local climate.

Eco-Friendly Options: Some tent rental companies offer eco-friendly marquee tents made from sustainable materials, allowing you to host a green wedding.

why marquee tents provide natural lighting :

Transparent Panels and Windows: Many marquee tents come equipped with transparent or semi-transparent panels and windows in their design. These panels are typically made from materials like clear vinyl or transparent plastic. These panels allow natural light to filter into the tent during the daytime.

Ambiance: Natural lighting creates a beautiful and inviting ambiance within the tent. The soft, diffused light from the outdoors can enhance the overall atmosphere, making it warm and inviting.

Energy Efficiency: Using natural light during the day can significantly reduce the need for artificial lighting, making your wedding more energy-efficient and eco-friendly.

Scenic Views: When set up in a picturesque outdoor location, marquee tents with transparent panels and windows provide scenic views of the surrounding landscape. This can add a stunning backdrop to your wedding and allow your guests to enjoy the natural surroundings.

Photography: Natural lighting is ideal for wedding photography. It produces soft, flattering light that can make for beautiful and memorable wedding photos.

Connection to the Outdoors: The presence of natural light and views of the outdoors can help create a sense of connection to the natural world, which is particularly appealing for outdoor or garden weddings.

Customization: You can control the amount of natural light by choosing marquee tents with different window configurations or by using curtains or blinds to adjust the level of illumination.

Why Choose Tents?

- » Much lower initial investment in comparison to conventional buildings.
- » Short production time, easy and rapid deployment.
- » Easy adaptation to any size of choice.
- » Less risky in terms of occupational accidents, little or no environmental noise during installation.
- » Easy and rapid relocation with minimal cost.
- » Almost no need for any footings or foundation in most cases. For short time temporary arrangements like events, the structure could easily be installed on any type of soil.
- » Steel construction and PVC membrane are environment friendly materials as they are 100% recyclable.
- » Unlike in conventional buildings, the PVC membrane doesn't require any painting, plastering or maintenance during the use of the product. Self cleaning property of the membrane makes it last for a long time with no or minimal maintenance.
- » No need for building permits for temporary deployments.
- » Provides an uninterrupted spacious interior space as the structure doesn't contain any internal columns or supports.
- » Translucent membrane lets a great deal of daylight in during the day time and reduces the need for artificial lighting.
- » Once the structure has served its purpose and is no longer needed, it could be easily rented or sold.
- » Under normal circumstances, PVC membrane can be used 10 to 15 years hassle free. Steel profiles, once treated with some anti-corrosion process, can be used for more than 25 years.
- » They are designed and manufactured to withstand seismic activities and other loads exerted by wind and snow just as in conventional buildings. These structures can be used many years in Northern Europe where extreme weather conditions are present.
- » They provide maximum safety due to fireproof and UV-resistant features of the PVC membrane.
- » All structures are designed and manufactured in accordance with the International Building Code.
- » With proper thermal insulation applied on the structure, substantial cost savings on energy bills are realized.
- » The sound absorbing characteristics of the fabric provides a tranquil and quiet environment within the structure.
- » Easy and fast digital print which is applied on the outer surface of the fabric could be used as a tag making the structure easy to identify. These digital prints can also be used for advertising and branding purposes.

Do you manufacture custom-designed structures?

Yes. Depending on the requirements of the project and upon customer request, we design and manufacture products that meet your special criteria. Our expert and friendly staff help you come up with the most affordable and efficient solution for your business needs.

What kind of material is used for the membrane?

The raw fabric is composed of 100% polyester high-strength lines coated by PVC to make the product resistant to water, fire, UV light and other harmful effects of environmental conditions.

What are the advantages of a fabric structure compared to conventional wood or concrete construction?

The main advantages of the fabric structures can be summarized as follows:

- » Affordable, low cost
- » Fast-track production
- » Easy installation and transportability
- » Installation on almost any type of ground
- » No need for reconstruction permit
- » Could be built practically in any size of choice
- » No need for footings, foundation or anchoring in most cases
- » Resistant to seismic activities and extreme weather conditions
- » No debris once the construction is brought down (as in concrete buildings)
- » Steel frame and the fabric used are made of 100% recyclable, environment friendly materials

- » Maximum reliability and safety during use
- » A spacious inner space due to absence of any internal supports
- » Easily expandable and extendible

PVC membrane is a waterproof and fireproof material. In case of damage, the fabric could be easily repaired by use of some matching fabric, heat welds and a roller. With proper insulation applied, you can get good sound absorption and temperature control which helps you lower your energy bills.
