

15x15m Heavy Duty Marquee Tent Reinforced Alloy Snow Load 850g/m² Heavy Fabric for Industrial Use

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Modular Marquees
- Frame: Hard Pressed Extruded Aluminum Alloy
- Roof Cover: PVC(850g/)
- Customized Span: 4~50m
- Ground Situation: Grassland, Earth Land, Asphalt Ground, Cement Ground, Marble, Etc.
- Accessories: Drapery, Air Conditioner, Heater, Floor, Window, Curtain, Lighting Etc.
- Application: Wedding, Party, Events, Banquet, Ceremony, Church, Shows
- Fire Resistance: M2,B1 Grade
- Highlight: **15x15m heavy duty marquee tent, reinforced alloy snow load tent, industrial heavy fabric marquee tent**

Product Description

DIN4102 Waterproof Event Tent Strong Large Modular Marquees For Outdoor Permanent Marquee For Sale

Description :

Brand Name	Tendars Tent
Certificate	ISO 9001:2008/SGS
Frame Material	Hard Pressed Extruded Aluminum Alloy
Connectors	Hot-dipped Galvanized
Roof Cover	850g/sqm PVC-coated fabric, Block Out
Sidewall Cover	650g/sqm PVC-coated fabric
Fabric Color	White, Red, Green, Clear or Customized Color
Side Wall	PVC /PVDF Walls/Glass Walls and etc
Wind Resistance	100km/h
Fixing Solution	Expansion Bolts, Tent Pegs, Weight Plate
Temperature Resistance	-30 degree Celsius to +70 degree Celsius
Flame Retardant	DIN4102, B1, M2
MOQ	1 Set
Sample	Provide After Negotiation
Model Number	AST; ART; CRT; PLT; SFT; CCT; MST; MXT; GBT
Features	Flame Retardant, UV Resistant, Waterproof
Function	Event, Wedding, Party, Ceremony and etc
Service Life	More Than 15 years
Logo Printing	Available
Manufacturer	Yes

System Features:

- 1.Four channel aluminum frame, hard pressed extruded reinforced aluminum
- 2.With extra eave/ridge braces to strengthen the frame over 20m span width
- 3.No poles inside, 100% interior space is available
- 4.Galvanized steel connection parts
- 5.Fabric is fire retardant and NFP92-507 standard approved by SGS
- 6.Bar tensioning roof system
- 7.Interchangeable parts between sizes
- 8.Wind load 100km/h
- 9.Full accessories available such as hard solid wall system,glass door units etc.

Heavy-duty marquee tents are equipped with a sturdy frame for several important reasons:

Durability: The primary purpose of a sturdy frame is to provide long-term durability. Heavy-duty marquee tents are designed to be used in rigorous conditions, and a robust frame ensures that the tent can withstand the wear and tear associated with repeated assembly, disassembly, and use.

Weather Resistance: A sturdy frame is essential for withstanding adverse weather conditions. It can support the weight of snow and ice in colder climates and can remain stable in strong winds. The frame's structural integrity ensures that the tent won't collapse or become damaged during inclement weather.

Wind Resistance: The frame is engineered to resist wind loads. In areas where high winds are common, a sturdy frame helps prevent the tent from being blown over or damaged by gusts of wind. It provides stability and security in windy conditions.

Snow Load Capacity: In regions with heavy snowfall, a sturdy frame is necessary to support the weight of accumulated snow on the tent's roof. This capability prevents the tent from collapsing under the snow's load.

Structural Integrity: The frame's design and construction, whether made of galvanized steel or heavy-duty aluminum, ensures that it can handle the stresses placed on it during assembly, use, and transport. Reinforced joints and components enhance the frame's structural integrity.

Safety: Sturdy frames contribute to the safety of those inside the tent. They reduce the risk of structural failure, which could lead to injuries or property damage.

Longevity: Heavy-duty marquee tents are often an investment, and a sturdy frame extends the tent's lifespan. A well-constructed frame can last for many years, providing a reliable shelter for multiple events.

Modularity: In some cases, the frame may be designed with modularity in mind, allowing for the connection of multiple tents to create larger covered areas. This adaptability requires a sturdy frame that can handle the additional loads and stresses of interconnected tents.

Load-Bearing Capacity: Heavy-duty marquee tents often have a high load-bearing capacity, which means they can support additional equipment and accessories, such as lighting, sound systems, and decorative elements, without compromising safety.

Ease of Setup: A sturdy frame can facilitate the setup process. The frame components fit together securely, making assembly more efficient and ensuring that the tent's structural integrity is maintained throughout the event.

FAQ :

Q1.Does your company accept customized tent?

A: Yes, we can make a tent according to our customer's different needs.

Q2.Does your company is a factory?

A: Yes, we are a factory, so our price is really reasonable, but with high quality.

Q3. Does your company provide any help to install the tent?

A: Yes, usually we will send manual instruction and CD to help our customers to install the tent.

Q4. Can your tent move to the other place after set up?

A: Yes, the mainframe of our tent is aluminum, so it is light in weight but with high strength, that is very easy to set up and dismantle.

Q5. How can I go to visit your company?

A: Our company is located in Guangzhou, south china city, when you in Guangzhou you can take the Metro 3 to Panyu Square then we pick you up there or you can take the taxi to our factory.
