

6061/T6 Aluminum 8x10m Heavy Duty Marquee Tent Fire-Retardant Canopy Clear Span for Commercial Events

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

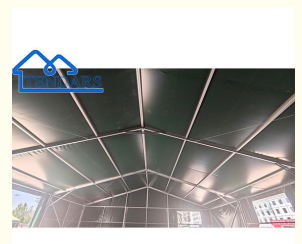

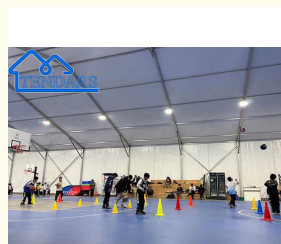

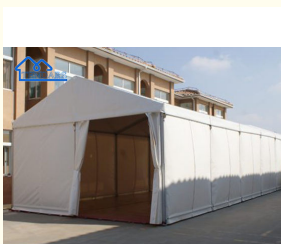

Product Specification

- Product Name: Projection Tent
- Frame: Aluminum Alloy Frame
- Roof Cover: 850g/m2 PVC Fabric
- Sidewall: PVC Walls
- Eave Height: Standard 2.5m, 3m, 4m, 5m Upon Span Width
- Color: Whited Or Customized
- Function: Water Proof, UV Resistance, Fire Retardant(DIN4102,B1,M2)
- Ground Situation: Earth Land,glass Land,cement Ground Etc.
- Highlight: **6061/T6 aluminum marquee tent, fire-retardant heavy duty canopy, clear span commercial event tent**

Product Description

2.5m Height Heavy Duty Marquee Tent Advertisement Custom Trade Outdoor Printed Projection Tent Large Marquee For Sale

Description :

| | |
|-----------------|---|
| Frame Material | Aluminum Alloy 6061/T6 |
| Feature | Anti-UV/waterproof |
| Cover material | Durable PVC-coated polyester textile fabric |
| Style | Modern |
| Connectors | Hot-dip Galvanized steel plate |
| Feature | Easily Assembled, Sustainable, ECO FRIENDLY |
| OEM item | Shape,size,color and fabric materials can be customized |
| Wind resistance | 80-100km/h |

Can meet the needs of:

1. warehouse storage
2. equipment protection
3. indoor work

In the industry of super large tent construction, there are significant differences between the status quo at home and abroad.

There are obvious differences between China and overseas construction methods, equipment, efficiency and other aspects. In the industry of super large tent construction, there are significant differences between the status quo at home and abroad. There are obvious differences between China and overseas construction methods, equipment, efficiency and other aspects.

First, let's look at the domestic set-up. In China, the construction of super large tents mainly relies on a large number of manpower. From the selection of the site, the preparation of materials, the construction of the structure to the completion of the entire project, every link requires a large number of people to complete.

Although this human-dependent mode can cope with some complex construction environments to some extent, it is relatively low in efficiency. A large number of staff often have some operational errors in the construction process, and for some high-intensity and difficult construction tasks, the limitations of manpower are more obvious.

In addition, there are some deficiencies in domestic safety regulations. Although the domestic tent industry is developing rapidly in scale and speed, it still needs to be strengthened in the development and implementation of safety standards and specifications. In the construction process, due to the lack of unified safety norms and standards, there are often some security risks and even security accidents.

Compared with the domestic, overseas tent construction has a different model. The overseas construction team is small, but well equipped. They use advanced automation equipment and efficient construction tools, which allows them to save manpower and improve efficiency during construction.

At the same time, the overseas construction team focuses on science and technology and innovation, and constantly develops new construction technologies and equipment. This innovative spirit has enabled them to maintain a leading position in the field of tent construction.

In terms of safety, the overseas construction team has a perfect safety specification system. They have clearly defined and enforced safety standards, processes and technologies for each project.

This rigorous attitude and standardized operation enable them to ensure safety and avoid accidents during construction.

FAQ :

1. Are you manufactory or trade company?

A: We are direct factory with 40000 square meters and specialized in producing all kinds of tents products.

2. Is the tent easy to install?

A: We have prepared a manual of installation instructions for the tents. It can be Div and egev to install

3.Are there standard or customized size?

A:Yes for tents will have standard size. And customized size will be acceptance. We will assist in designing the drawings according to your site

own. For membrane structure project need to be customized.
