## Product Description

### NFPA701 Heavy Duty Marquee Tent Fire Prevention Outdoor Event Tents Sporting Goods Canopy

#### Description :

Material	Hardpressed Extruded Aluminum Alloy 6061-T6
Available Size	84 x 48 x 3mm, 112 x 203 x 4mm, 166 x 88 x 3mm, 120 x 200 x 4mm, 120 x 250 x 4mm, 120 x 300 x 5mm, 120 x 350 x 6mm, 120 x 400 x 6mm (depend on the span size)
Main Quality	Hardness At Least 250 MPa
Profile	Features of Frame Stainless, Lightweight, Durable, 4 Channel
	Windload Up to 120km/h
	Density 850g / sqm Block-out white PVC Tarpaulin, 950g / sqm transparent PVC Fabric; 650g/sqm White PVC for Sidewall
	Thickness ≥0.67mm
Cover	Features Best performances in breaking strength, water-proof, UV-proof, flame retardant (DIN4102 B1 M2 / NFPA701)
Component	Superior Enclosure with Hot Dip Galvanized Steel.

#### The stadium tent :

Compared with traditional buildings, the stadium canopy can be directly built on the original outdoor basketball court ground, which undoubtedly greatly reduces the cost of the stadium, the modular construction is very simple and fast, can be put into use in a short time, there is no garbage and dust generated during the construction process, the whole process is very green, and can be moved according to actual needs. And in line with the concept of sustainable development!

Stadium tent according to the requirements of different regions, there are A variety of forms to choose from, such as: A-shape, multi-arch, curved ceiling, spherical, etc., beautiful and practical, the internal space can also be customized according to your needs, including internal configuration, external modeling or spray wall, etc., to provide a dynamic and passionate atmosphere, of course, the space can also be used for other sports, with a good cost performance.

Stadium canopies can also be equipped with a full set of lighting systems, air conditioning systems, fire protection systems and security systems, which can achieve one-stop service and save time. Partitions can also be added in the tent venue according to needs to meet the functions of cloakrooms, medical points, lounges, and commissaries. The stadium canopy can be made into a rain baffle, outdoor drainage ditch, and the roof can be added to keep the indoor dry, giving you a relaxed and comfortable sports environment.

#### Why sport tents are so popular ?

National fitness facilities are an important position for the broad masses of the people to carry out fitness activities, and play an important role in satisfying the people's yearning for a better life. The eye-catching "China speed" of the indoor sports venue canopy has been recognized by the world. Of course, you can also see them on urban rooftops, shopping malls, gardens, and parks.

When building a stadium, in order to minimize the impact on the lives of surrounding residents, it is usually necessary to close the construction site. However, for fixed building venues, due to its long construction time, it often takes several months or even longer to complete, which inevitably has a certain impact on the daily life of surrounding residents. In contrast, indoor sports venues have many advantages in the construction process.

The construction time of indoor sports tents is relatively short, and a 3,000 square meter tent usually takes only 2-3 weeks to complete. This means that problems such as traffic congestion and dust pollution caused by construction can be greatly reduced, thus reducing the disturbance to the lives of surrounding residents.

There is also the fact that the construction of a fixed building stadium usually costs millions of dollars, which is very unfriendly for friends with a low budget. The indoor sports venue canopy is only one-tenth of the cost of the fixed building, mainly including the cost of the canopy itself, foundation treatment, internal facilities and approval fees, etc., usually costing between 300-600 yuan per square meter.

A budget of hundreds of thousands of dollars can also build a good arena, you can do sports training, you can contract games, rent venues for activities, and so on, quickly return the money to make a lot of money. All in all, the indoor sports venue canopy is a very cost-effective building.

At present, it has been widely used in basketball courts, football fields, swimming pools, equestrian halls, badminton halls and other sports projects. Huaye indoor sports venue tent manufacturers have also been following strict quality and safety standards, with quality service to bring people more environmentally friendly multi-functional sports venues.

**FAQ :**

**Q1. How Long Will a Tendars Clear Span Structure Last?**

In the reasonable using, the lifespan of the aluminum alloy can last over 30 years and the PVC cover is guaranteed up to 5 years. And Tendars will offer you an affordable price for component replacing.

**Q2. Can Tendars Tent Structure be Relocated?**

All of our tent structures is designed into relocatable construction. For the seasonal and regional using, you can dismantle, store or remove the tent to any location. Also, our tent structures are allowed to be permanent building as sports center, industrial warehouse or exhibition hall.

**Q3. Can I Expand the Tent Size or Replace the Accessories of the Tent Structures in the Future?**

Sure. All of our tent structures and accessories are made into modularity. You can expand the tent length by adding bay distance (the distance should be in original length) unlimitedly. Also, the accessories can be replaced into a new one, we will offer affordable price of components replacement to our clients.

**Q4. Have Oversea Rental Service or Buy Only?**

For more economical solutions, Tendars does not provide oversea rental service. Since we are the clear span tent manufacturer, we offer factory price which without any extra fee like commission from trade company. So you will enjoy the most cost-effective product and tent solution from Tendars.
