Why can basketball court prefabricated sheds replace traditional stadium buildings?

In fact, the basketball court assembly shed is a temporary building, the approval process is simple, followed by the basketball court assembly shed production and construction speed is fast, the aluminum alloy frame of the tent can be completed in 7 days, the site construction of 5000 square meters generally only takes 3 days to build completion, greatly shortening the construction period, and finally the cost of the basketball court assembly shed compared with traditional venues, The cost of the tent is only one third of the price of the fixed building, and the cost of the basketball court assembly shed is low, and the capital return is fast, which is also the reason why people who know the tent will recommend it.

In modern times, most people would rather spend money to go to indoor venues, and the comfort of the sports environment is what they pursue. The basketball court assembly shed with strong scalability can meet the needs of the user environment, and the internal environment of the venue can be improved through different supporting facilities.

For example, the lighting system can be added to enable sports even at night, and facilities such as seating, air conditioning, resting areas, and laying of sports MATS can be added at the same time to create a comfortable sports environment. The tent can meet all the needs of the indoor arena, in addition to being an indoor basketball arena, it can also be used as a football arena, badminton court, tennis court, skating arena, even swimming arena and equestrian hall.

Why sport tents are so popular ?

The temporary basketball tent is composed of aluminum alloy frame and tarpaulin, and the materials used in the tent can be used repeatedly, which is safe and environmentally friendly.

First of all, the frame is made of special high-strength aluminum alloy, which can resist 8-10 strong winds in the outdoors, and the top surface is made of transparent pvc or pvc coated cloth with waterproof, flame retardant, shading, tear resistance and other characteristics.

All around can be provided according to the actual application needs of pvc tarpaulin glass curtain wall double foam or rock wool sandwich board and other beautiful and practical new materials, can meet the different needs of the environment. Such a temporary basketball tent can be made 3-80 meters span length is a multiple of 5 unlimited extension, temporary basketball tent can be used immediately after completion.

These advantages are very attractive to business owners who want to invest in the sports industry. The temporary basketball tent has excellent adaptability and flexibility. They can be customized and adjusted according to different sports needs and field conditions.

Whether it is football, basketball, tennis, badminton or other indoor sports, aluminum alloy sports tents can provide a safe, comfortable, with standard size and rules of the sports field. This allows the canopy to adapt to the competition and training needs of different sports and can be changed quickly as needed. And our sports tent on the site requirements are low, can be on the roof, the existing site transformation, flat, grass, asphalt ground.
