Product Description

Sports Hall Tent Removable Aluminium Alloy Frame Stadium Waterproof Easy Up Tent Weather Tent Sports

Description :

Size	Customized 10~60m
Color	white or other colors
Frame material	Aluminum Alloy 166mm*88mm*3mm
Roof cover	950 clear pve or 850g/Sqm Flame Retardant Block Out Double PVC-Coat
Side wall cover	glass walls or 650g/sqm Double-coated PVC Fabric
MOQ	1 set
Feature	Waterproof/Flame Retardant/Wind-Resistant
Max. wind load	100km/h (0.5KN/SQM)
Allowed Temperature	-30 Degree Celsius~+70 Degree Celsius
Application	outdoor event weddings

System Features:

- 1.Four-channel aluminum frame, hard-pressed extruded reinforced aluminum
- 2.With extra eave/ridge braces to strengthen the frame over 20m span width
- 3.No poles inside, 100% interior space is available
- 4.Galvanized steel connection parts
5. Fabric is fire retardant and NFP92-507 standard approved by SGS
- 6.Bar tensioning roof system
- 7.Interchangeable parts between sizes
- 8.Wind load 100km/h
- 9.Full accessories available such as hard solid wall system, glass door units, etc.

Some general considerations regarding the height and space of sports tents:

Peak Height:

Peak height refers to the highest point of the tent. Sports tents can have peak heights ranging from around 4 feet for smaller models to 7 feet or more for larger tents. Tents with higher peak heights generally provide more headroom, allowing occupants to stand and move around comfortably.

Floor Space:

The floor space of a sports tent is typically measured in square feet. Smaller tents may have around 20 to 30 square feet of floor space, suitable for a few people, while larger tents designed for group events or team gatherings can have floor spaces exceeding 100 square feet or more.

Center Height:

Some tents provide a center height measurement, which is the height of the tent at its center. This measurement can give you an idea of how much headroom is available in the middle of the tent.

Layout and Design:

The layout and design of the tent can also impact the usable space. Dome-shaped tents may offer more headroom towards the center, while cabin-style tents often provide more consistent height across the entire floor space.

Customization:

Some sports tents come with features like removable dividers, which can be useful for creating separate spaces within the tent. This allows for more flexibility in using the available space based on the specific needs of your event or activity.

Footprint Size:

Consider the overall footprint size of the tent, as this will affect where you can set it up. Larger tents may require more open space, so be sure to choose a size that fits the available area.

FAQ :

1.Q: Is that factory price?

Yes. We assure you all prices are based on factory.

2.Q: What documents are available?

A full range documents including structural drawings, packing list, installation manual and relative certificates can be provided. Moreover, customs declaration is provided. We provide one-stop service for you.

3. Q: Can you print our logos on tent?

A: Yes. Customized logos can be print on the tent fabric according to your requirements

4.Q: Is your tent strong and stable enough? How about the wind loading

A: our tent structure is safe and strong and can resist wind up to 100 km/hr.
