TDS-40	40m	3.89m	13.5m	5m	300x120x5mm
TDS-50	50m	3.89m	15.5m	5m	300x120x5mm

Please contact the seller to get the latest tent's information

Main Frame: High Reinforce Aluminum, anti-rust surface, GB6061-T6 ;100%"FENGLV "Aluminum Material Guaranteed; It can be used more than 30 years.

Fabric Cover: 850g/m² and 660g/m² Double PVC-Coated Polyester, flame retardant, UV resistance, waterproof, comply to DIN 4102 B1(European standard); 100% XingYiDa PVC Material Guaranteed - Perfect Fabric Cover Brand in China Recently. Connector: Hot-DIPPED Galvanized Steel Connections; 100% Zinc Shine Hot Dip Galvanizing Guaranteed.

Allowed Temperature Condition: -40°to +70°temperature

Max Wind Speed Allowance: 100km/h

Snow Load: 75kgm

Easy to be assembled and dismantled, movable. No pole inside, tent space can be 100% utilized.

Advantages of the stadium canopy:

1. Cost saving and efficient platform building.

Compared with the construction materials of a large number of traditional stadiums, the tent stadium can save a lot of costs in terms of materials and labor, and the components of the tent are prefabricated in the factory, and the components can be assembled on the site, and the thousands of square meters of the tent stadium can be built in only a few days!

2. Solve the problem of site and site idle;

Because the tent has no special requirements for the construction of the site, it can be built in various open Spaces that are not conducive to the construction of the outdoor space, as well as the low-rise top floor, which can not only reduce costs, but also effectively use land resources. And many stadiums built for large-scale sports events, often after the end of the game due to a single function and become idle, but the stadium canopy can be directly dismantled after use, but also can be reused or transferred to multiple places to use!

3. Choose a variety of solutions.

In addition to a variety of specifications and types of options, large tent venues can also provide a variety of corresponding solutions according to customers' different sports needs and cost budgets. For example: only the low-cost scheme of shade and rain, the scheme of direct construction on the original sports field, the internal configuration of the sports field, in addition to creating a variety of different needs of the scheme.

Compared with the construction materials of a large number of traditional stadiums, the tent stadium can save a lot of costs in terms of materials and labor, and the components of the tent are prefabricated in the factory, and the components can be assembled on the site, and the thousands of square meters of the tent stadium can be built in only a few days!

What are the advantages of transforming indoor aluminum alloy tents into sports venues?

1. First of all, the approval process, the aluminum alloy canopy is a temporary building, the approval is simple and convenient, and the canopy tarp has the effect of flame retardant from fire and self-extinguishing on the fire level can be accepted.

2. Secondly, the safety performance, the main frame of the tent is the frame of the aluminum alloy structure, the steel parts are linked, the base is fixed, the wind resistance level can reach 8-10, and the roof of the tent is specially added with transverse wire for snow load resistance.

3. Moreover, there is a cost problem. From production to construction, all the frames of the sports tent are made in the factory, which is a big expense for the reconstruction of the indoor sports tent in the open field from the construction cycle to the labor, which greatly saves the cost.

4. Decoration: Rest seats can be installed around the stadium, and a series of facilities and equipment such as LED lights, ceiling fans and air

conditioners can be installed inside the tent.

FAQ :

Q1 What is the MOQ in TENDARS?

Normally 200 sqm; or pls go to ask customer service;

Q2: Can you print our logos on the tent?

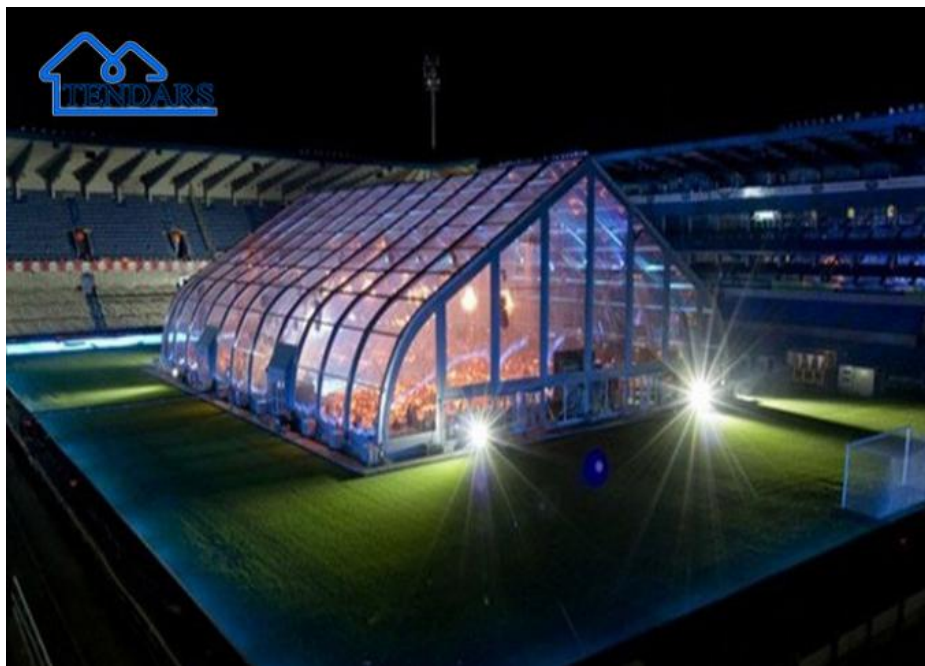

Yes. Customized logos can be printed on the tent fabric according to your requirements.

Q3. Do You Provide Any Guidance on the Job-site?

We will attach the build instructions in your product package. If you need, we will send our technology staff and project manager to provide installation guidance in your job-site.

Q4. How Long Will a TENDARS Clear Span Structure Last?

In the reasonable using, the lifespan of the aluminum alloy can last over 10-15 years and the PVC cover is guaranteed up to 5 years.
