The difference between the tent wedding and the hotel wedding:

The main body of the tent wedding is composed of aluminum alloy or steel and tarpaulin. As you all know, a tent can hold a wedding!

1. The wedding tent frame is composed of solid materials (high-quality steel, aluminum, etc.), with strong and safe characteristics;
2. It has the advantages of wind, rain and sun protection;
3. When the tent is built, the length can be increased or reduced according to the size of the scale;

As we know little is, the tent wedding can also be held very elegant and beautiful! Wedding tent because of the characteristics of wind, rain, sun protection, even if the weather is bad, it can be held as usual.

Choose to hold a wedding in the tent, you can not be limited by time, that is, day or night. Wedding Peng room rental costs are much more affordable than the hotel, and there are not too many restrictions on the choice of venue, tent wedding is an option.

Fixed mode :

(1)Weighted Plate consolidation; sand and concrete, such heavy things to be placed into the plate. (This method always be suitable for the indestructible ground.)

(2)Permanent Solution; this method is adopted for long term appliance. The consolidation system is casting into the ground. It is very stable.

(3)Expandable Screw; for the ground, which maybe set the screw into the hard ground, like concrete ground.

(4)Anchor fix way, this is a method for the soft ground, like grass and muddy ground.
