Luxury Party Marquee Tents House Top Rated Canopy Tents Snowload NFPA701 Commercial Party Tents For Sale

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Top Rated Canopy Tents
- Frame: Aluminum Alloy Profile Extruded
- Roof Cover: Double PVC-coated Fabric, waterproof, fireproof, sunproof
- Side Wall: Soft PVC Walls, Sandwich Panel, Glass Wall
- Frame & PVC Quality: Water-proof, sun-proof, UV-proof, rust-proof
- Accessories: PVC Windows, Glass Door, Stake, Stake Puller, Rain Gutter, Lining And Curtain, Flooring System, Glass Walling System, Weight Plate, ABS/Sandwich Wall System, Lining, Curtains, bathroom Ect.
- Fire Resistance: DIN4102, B1/M2, NFPA701
- Application: Weddings, Parties, Factories, Workshops, Exhibitions, Events, Etc
- Highlight: **15cm Snowload Party Marquee Tents, NFPA701 Party Marquee Tents**

Product Description

Luxury Party Marquee Tents House Top Rated Canopy Tents Snowload NFPA701 Commercial Party Tents For Sale

Product Specification:

certification	CE approved
windload	80km/h
snowload	15cm
aluminum alloy Frame	Life span: 10-15 years if well maintained frame is strong,durable,light in weight,not easy to rust and distort.
Fabric Cover	Life span: 5-8 years if well maintained 100% waterproof, flame retardant to DIN4102 B1, UV resistant, tear resistant, self-cleaning ability Resistant temperature: -30 to +70degree

About the party tent :

fabricbuilding is a temporary or semi-permanent structure consisting mainly of alloy profiles or steel frames and cloth Sex architecture. Can be used for short-term outdoor activities, or for large area, large span, internal space unobstructed, and fast Temporary or permanent works for speedy loading and unloading.

The main frame of the tent is a high-strength hollow aluminum alloy structure or steel structure, and the adjustable base can make up for the unbalance of the site

With PVC tarpaulin, the tarpaulin has the good performance of non-stretching, rain proof, UV proof, light proof, and fire protection level Home standard, the use of high-frequency welding technology, the wind resistance of the tent reaches 80-100 km/h.

The structural frame of the tent is generally based on aluminum alloy profiles and steel, and the aluminum alloy frame has beautiful appearance, good durability and no rust

Features.

The development and application of PVC building film material is relatively early, and its base material is polyester and polyamide fiber fabric.

Coating master

To be polyvinyl chloride (PVC) resin, the weight of different coatings should be between 400 and 1500g/m2 according to the functional requirements

Layer should choose polyvinylidene fluoride resin (PVF), polydifluoroethylene resin (PVDF), polypropylene resin (ACRYLIC), silicon tree Fat, etc., and should have the function of improving the self-cleaning and anti-aging properties of PVC film materials. PVC building film according to strength grade

Divided into I, II, III, IV, V levels. The thickness of the PVC film material should be greater than 0.5mm. The surface layer should be stable during the shelf life

The corrosion resistance, anti-ultraviolet erosion ability, and should have self-cleaning performance.

Tent use and maintenance knowledge:

1. Avoid sharp scratches to the tent, affecting the use effect;
- 2, after the tent is used, all spare parts should be collected for reuse;
- 3, the handling process should be as light as possible to prevent damage to the outer packaging, so as not to lose parts;
- 4, such as the use of electrical appliances in the tent, please pay attention to the wire and support to have good insulation, otherwise there will be a risk of electric shock;
- 5, before building the tent, you must carefully survey the terrain, there are no Rolling Stones, rolling wood and weathering above the site Rocks, etc.;
- 6, when installed on mud or sand, you can dig drains around to ensure that the surface of the tent is dry;
- 7, predict the local wind more than eight or more, please reinforce the tent in advance.
- 8, tarpaulin storage before be sure to air, to be restored to dry after folding storage, such as too late to dry tarpaulin cool, Remember that it must not be stored for a long time to avoid mildew.
- 9, depending on the local humidity and climate conditions, regularly dry tarpaulin, so as not to breed bacteria, so that tarpaulin waterproof coating To the destruction.

RFQ :

***Q1. Does your company provide any help to install the tent?**

A:Yes, usually we will send manual guide books or Video to help customer installation.If customer need our engineer come to their country to help install,that is also workable.

***Q2: Does your tent be able to install repeatedly?**

A:Yes, Our tents can be assembled and dismantled and repeatedly.They installed sections by sections,Aluminum structure can be used for 25 years,PVC fabric can be used for 8-10 years.

***Q3:What is the lifespan for the tents?**

A:The Lifespan for aluminium frame or galvanized steel frame is 15-20 years,lifespan for roof cover is 8-10 years under proper use.

***Q4:What's the delivery time?**

25 days after deposit.

***Q5:How to order?**

Inquiry → Quotation → Negotiation → Samples → PO/PI → Mass production →Book Space → Balance/Deliver → Further.
