  3. Easy installation and disassembly, it is the best product for outdoor exhibition.
  - 4, the tarpaulin can be folded, the frame is small after removal, easy to transport and storage.
  - 5, • Unit combined structure, can be freely increased or divided according to the size of the site.
- Canopy spans from 6 meters, 8 meters, 9 meters, 10 meters, 15 meters, 18 meters to 50 meters, etc.
  - Easy setup and disassembly.
  - There is no need for load-bearing pillars inside the tent and the site is 100% used.
  - No special requirements for building sites, generally flat ground such as sand, grass, asphalt, cement and tile Any noodle can be used.

#### Main structure :

The main structure of the tent is composed of two parts, one is the aluminum alloy main frame, and the other is the tarpaulin. In fact, it is often equipped

Other comprehensive supporting facilities to beautify and perfect various theme events held.

1. The main structure of the tent is made of high-strength aluminum alloy profiles. The building principle is aluminum box beam frame with support between columns

The connection is made of steel parts, the roof is reinforced by steel cable cabling, and the roof and wall are protected by base cloth. Material selection of aluminum alloy profile

GB/T-6061 standard, inspected by the National non-ferrous Metal Quality supervision and inspection center, the material qualified. The foundation of the tent works is strong,

The materials and structures used have high integrity and safety. The structure meets strict European standards. Integral structural warp Wind tests and damage tests conducted by professional organizations.

2. The tarpaulin is a professional coated fabric PVC. Durable bonding properties: Application fluids for knife-scraping coating technology

The physical and chemical bond of PVC and fiber, and the slurry is directly coated and scraped on the fabric; Strong weldability: fabric energy after welding

Withstand a lot of tension, even in hurricanes, frequent operation and other harsh environment, will not affect the sealing degree of the welding; Resistance to

Long service life: A certain thickness not only gives the blade coated fabric good UV resistance, but also extends the product

Service life; Good color fastness: Because the pigment is directly immersed inside the PVC coating, the razor coated fabric can be protected The color is always bright as new. Anti-corrosion, anti-mildew, anti-ultraviolet and flame retardant (M2 and B1) and other properties are up to international standards,

If properly used and stored, decay and mildew will not occur within three to five years.

Third, supporting system. There are six series of tent supporting, including wall, floor, furniture, lamps, fabric and its

His comprehensive type of supporting, all the integrated design, only think, nothing can not be done. Mainly for different nature, wind

Our activities are all about providing comprehensive, concrete and perfect space solutions.
