Canopy with its instantaneity, large span, natural lighting, long life, beautiful and other excellent performance replacement transmission Unified architectural form to achieve your architectural requirements. If your needs change it can be quite accommodating Relocate or expand In today's rapidly changing environment this flexibility can be very beneficial. For STH Some special environmental conditions and practical requirements compared with traditional buildings canopies can better reflect its form and material The advantage on.

The fixing of the tent :

The different conditions such as the scale of the tent, the use time and the ground conditions have very different requirements for the foundation Whether it is a permanent building or a temporary building the fixing of the tent has the following types
The embedded parts or expansion bolts are secured
For large awnings that have been used for a long time , it is necessary to make foundation embedded parts or use expansion bolts to fix In a concrete floor or concrete floor beam.
Movable tyre type fixation
For use in tent systems with mobility requirements.
Steel fastening method
The use of steel to fasten awnings on lawns asphalt or other soft sites mainly used for temporary awnings.
Attach with weights
If the site is damaged because the use of steel or expansion bolts is not permitted cement piers, water tanks and water tanks can be used Heavy blocks such as sandbags are used to secure the shelter for temporary shelters where the floor is not allowed to be damaged.

RFQ :

Q1. What is the Standard Size of Clear Span Structures in TENDARS?

TENDARS provides a variety of spans option for our clients. The width can be chosen from 3m (10ft) to 60m (200ft) with unlimited length (expanding by 3m or 5m bay distance). In addition, the diameter of our latest product - TENDARS DOME can be optional from 3m (10') to 100m (300').

Q2. Is your tent strong and stable enough,How about the wind loading?

Yes,Steel structure and cover wind resistance and load bearing is calculated by professional software and Experience engineer team,will be more than we planned 50%.The wind load at least more than 120KM/H.

Q3. What's the material of the cover,does it can last long time?

The cover material is PVDF or PTFE.PVDF can last more than 15-20 years.PTFE can last more than 50 years.It have fabric inside,so it very strong,not easy to be torn.

Q4. When will you ship the orders?

Once the design of tent is confirmed,we will arrange production plan,and inform you of the leadtime.generally it takes about 7-25 working days.
