For example, the current domestic conventional tent side The height is generally 4m, but as some style This height is very useful for active use Limited sex, requires special treatment, will edge Increase the height to 5m or 6m; For brevity, often The design of the tent house is generally not with Floating eaves, while many customers may need to set Plan a canopy with floating eaves to extend the canopy The use of space, at the same time both rain shade The function of.

"On the technical side, customized services can Fully realize the individual needs of customers, including The style and material of the tent can be according to the customer

Change is required." Tian Li, for example, compared
Such as the side wall of the tent, the conventional glass side wall is
There's a whole side of glass, but it can vary
The needs of households, the tent design with the house
Like, half designed as closed side walls, and the other
Half of them have outward-opening glass Windows, okay
Close or open at any time to enhance the transparency of the tent
Gas, ventilation.
By promoting custom services, awning
Housing captures customers with differentiated needs,
Thus making the company in recent years at home and abroad
The scale of the business has grown rapidly, only in terms of exports,
Overseas sales in the first three years
It's doubled.
