- Available width: 6.00m 8.00m 9.00m, 10.00 m
- 20.00 meters 12.00 meters 15.00 meters
- Side height: 2.30 meters, 3.00 meters, 4.00 meters
- Bay distance: 3.00 m, 5.00 m
- Structure length: unlimited
- Roof form: A shape with a pointed roof

Advantages of a tent :

Canopy with its instantaneity, large span, natural lighting, long life, beautiful and other excellent performance, instead of traditional building forms,

Realize your architectural requirements. If your needs change, it can also be easily migrated or expanded quickly in today's world. In changing circumstances, this flexibility is very beneficial. For some special environmental conditions and practical requirements, with traditional architecture

In contrast, the tent can better reflect its form and material advantages.

Because of the flexible disassembly, storage and transportation, the tent is called "mobile real estate". Tent series products to standard unit combination

Type, span from 3 meters, 6 meters, 8 meters, 10 meters, 15 meters, 18 meters, 20 meters to 25 meters, the length can be limited extension, also

It can be flexibly customized according to the style of exhibition activities and the characteristics of the venue. At present, it is widely used in professional exhibitions, fairs,

Celebrations, outdoor weddings, sports events, festivals (music festivals, beer festivals, food festivals, etc.), temporary warehouses, factories Housing, temporary construction, emergency disaster relief, etc.

The self-cleaning performance of the tent: Because the PVC film material is treated with chemical agents, its surface is not vacuumed, anti-pollution and anti-mildew

Bacteria have the comprehensive characteristics of maintaining the self-cleaning of the membrane surface. The PVC film we use has high self-cleaning performance, one

In terms of preventing the aging of the substrate and PVC coating, extending the life of the film material, on the one hand, making the surface non-stick to ash and rain

The condensation of water can make the surface of the film natural cleaning. According to the application of different products, we use 5-20 years of life

The membrane of life. In addition to the use of special PVC film material, so that it has to filter part of the light, its own tent structure can also be installed

Install hard wall panels, glass walls, glass doors, air conditioning in the room, can adjust the temperature in the tent.

The optical performance of the tent: The optical performance is also very important for PVC film material, and it is mainly applied in the product For shading tarpaulin and semi-shading tarpaulin. Its role:

First, it can filter out most of the ultraviolet rays to prevent the fading of internal items;

Second, it has a certain transmittance to natural light, so that the transmission produces diffuse light inside the structure, no shadow, no glare, and at night

When the light is illuminated, it emits a natural soft glow, which is intoxicating;

Third, cool in summer and keep warm in winter.

Combining the advantages of the above tents, the development of tents has mushroomed.
