Package	International standard export package: EPE Cotton→Bubble Pack→PVC bag→Woodbox		
Freight	By sea ect.		
Payment	T/T, 30% deposit, 70% before shipment,western union, trade assurance		

Let the lights light your tent :

Lamps not only have the role of lighting, but also the value of decoration. In the past, there were few lighting choices and a lot of design styles Limit. Now, canopy experts can easily design special lighting effects for any event.

Lighting is mostly used in hotel ballroom, conference center and special event lighting after a small change can also be

When used in a tent, the only real consideration is the weight limit that the tent columns and diagonal beams can bear.

LED lighting is widely used in the tent, the price continues to decrease, the operation is becoming easier and easier, more and more tent rental companies

Realize the advantages of LED lighting.

The biggest feature of LED lighting is that it greatly reduces power consumption, saving 50% - 80% of the electricity than conventional lighting equipment

Amount. In a variety of small and large activities, the use of LED lighting equipment can save additional generators, so that not only the section Costs are reduced, as well as time, noise pollution and space. In addition to saving electricity, another benefit is that it generates less heat.

tradition

The lighting equipment and PAR lights generate a lot of heat, and after an event, if LED lights are used, workers do not have to wait

The lights cooled before they were removed.

A popular and affordable custom lighting solution, especially for weddings, is to use GOBO lights, the name of the bride and groom

Can be set into a pattern, projected above the tent or on the floor.

The lighting design on the outside of the tent is just as important as the inside. When night falls, the lights of the road, the lights of the trees and the tents

Outside lighting, all lighting is very important to the overall effect of the event.

In a tough economy, the versatility of lighting can make a budget-conscious customer happy with a simple color change

Change or a different projection pattern will bring out another style!

For social events and weddings, the use of LED PAG products not only makes those cost-conscious customers happy,

It also raises the floor price of the leasing company.

The lighting needs to be adjusted according to the time of the event and the environment. If the event is held during the day, especially in the summer,

When the sun is about to go down, guests begin to enter the table at 7 o'clock, but it is still bright outside, and at this time, the lighting inside is not good

Often bright.

When it gets dark outside, we start lowering the lights, and it gets dark inside the tent.

In the tent, different areas use different lighting, guests will find their comfort, some people like bright

Some people like dim lights.

When holding an event on the grass, the indoor light is brighter than normal, reducing the green reflected on the grass by outdoor lights

The light reflected off the roof of the canopy.
