Product Description:

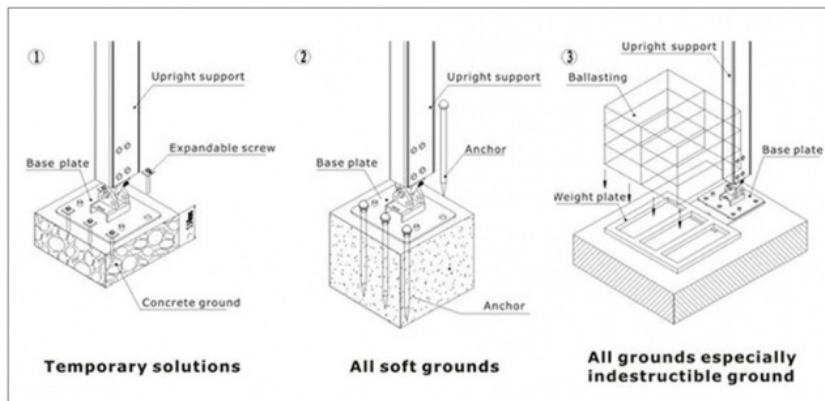

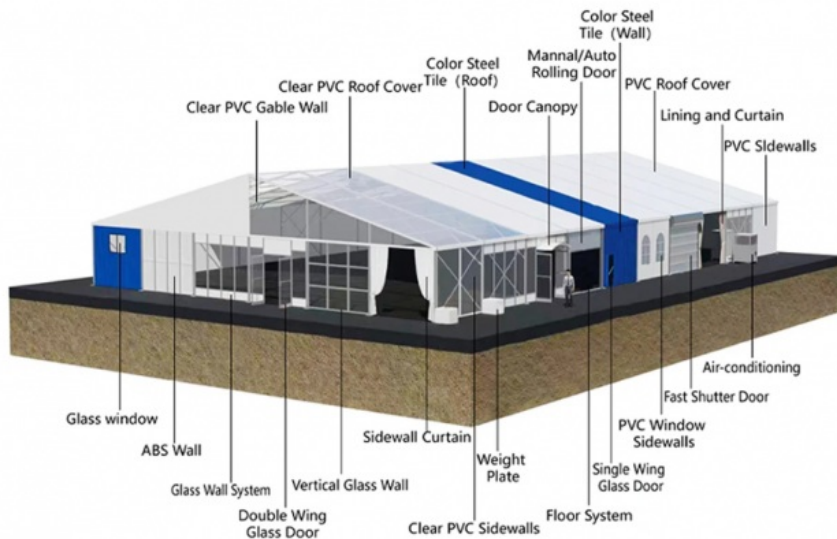

size	customized
colour	customized
shape	customized

Our strengths

- much styles • Constantly update new products
- Faster delivery and lower shipping costs
- Drop shipping
- Excellent service,excellent products

Deails:

Here are some common materials used in tent construction and their characteristics:

Nylon: Nylon is a lightweight and durable synthetic material commonly used in tent construction. It is known for its strength-to-weight ratio, tear resistance, and water repellency. Nylon tents are suitable for backpacking and hiking due to their lightweight nature.

Polyester: Polyester is another popular choice for tent fabrics. It is durable, abrasion-resistant, and has good UV resistance. Polyester tents are known for their colorfastness and resistance to stretching and shrinking. They are suitable for a wide range of camping applications.

Canvas: Canvas tents offer excellent durability, breathability, and insulation properties. They are often used for longer-term camping or glamping due to their natural look and feel. Canvas tents provide better temperature regulation and are more resistant to condensation compared to synthetic materials.

Polyethylene (PE): Polyethylene is a type of plastic commonly used for tent floors and tarps. It is waterproof, easy to clean, and relatively inexpensive. PE tents are often used for car camping and backyard camping due to their affordability and durability.

PVC (Polyvinyl Chloride): PVC-coated fabrics are highly waterproof and durable, making them suitable for tents designed for harsh weather conditions. PVC tents are often used for expedition camping, mountaineering, and other outdoor activities where weather protection is crucial.

Silicone: Silicone-coated nylon or polyester fabrics offer exceptional waterproofing and durability while remaining lightweight. Silicone-treated tents are popular among backpackers and ultralight enthusiasts due to their low pack weight and compactness.

Ripstop: Ripstop fabrics are woven with reinforced threads at regular intervals to prevent tears and rips from spreading. They are commonly used in lightweight and high-performance tents to enhance durability and longevity.

Aluminum: While not a fabric material, aluminum is often used for tent poles due to its lightweight, strength, and resistance to corrosion. Aluminum poles provide sturdy support for tent structures while remaining lightweight and easy to pack.

FAQ :

Q1. You are manufacture factory or trading company?

We are manufacture factory. And you are welcomed to visit us at any time. The quality control flow and sales team will show you our professionalism. Also you will can get best and most competitive price after visiting us.

Q2. Is your price competitive compared with other companies?

Our business objectives are to give the best price with same quality and best quality with the same price. We will do everything we can to reduce your cost and guarantee you get the best product that you paid for.

Q3: Can you print our logos on event tent for sale?

Yes. Customized logos can be printed on the tent fabric.

Q4: Is your tent strong and stable enough? How about the wind loading?

Yes. The main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6), so our tent structure is safe and strong enough to resist wind up to 100 km/hr.

Q5. Do you accept container loading inspection?

You are welcomed to send an inspector, not only for the container loading, but any time during the production time.

Q6. Does your tent be able to installed repeatedly? What is the life span?

Sure, our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

Q7: How long is the warranty period?

Guarantee is one year. During the warranty period, we shall repair or replace the damaged part accordingly because of any damage due to quality problem.

Q8: How is the quality of the product guaranteed?

Our products will be strictly tested by the quality inspection department before leaving the factory, and each product will be strictly controlled to ensure product quality.

Q9. How can you get aquotation for your projects?

You can contact us by email, phone, Alibaba TM, WhatsApp, and so on 24*7 and you will get reply within 8 hours.
