Eave Connection	Hot-dip Galvanized twin steel plate
Wind Loading	100km/hour

#### Here's an outline of the principles involved:

**Structural Stability:** Wedding marquees are designed to offer structural stability and safety for hosting events. The principle involves using high-quality materials for the frame, such as aluminum or steel, to ensure stability even in varying weather conditions.

**Customization:** The principle of customization allows for tailoring the wedding marquee to the specific requirements and preferences of the wedding party. This includes choosing the size, layout, and design elements such as flooring, sidewalls, windows, doors, and interior decor to create a unique and memorable wedding venue.

**Aesthetic Appeal:** Wedding marquees are built with the principle of aesthetic appeal in mind, offering a visually stunning backdrop for the wedding ceremony and reception. This involves selecting elegant fabrics, colors, and design features to complement the wedding theme and enhance the overall ambiance.

**Versatility:** The principle of versatility ensures that wedding marquees can adapt to various venue locations and event styles. Whether set up in a garden, on a beach, or at a formal venue, wedding marquees offer flexibility in configuration and layout to accommodate different settings and guest capacities.

**Ease of Installation:** Wedding marquees are designed with the principle of ease of installation, allowing for quick and efficient setup by experienced professionals. This involves using modular components and assembly techniques that streamline the installation process, minimizing disruption and ensuring timely completion before the wedding event.

**Durability and Longevity:** The principle of durability focuses on using durable materials and construction methods to ensure the wedding marquee withstands the rigors of frequent use and adverse weather conditions. High-quality fabrics, reinforced stitching, and corrosion-resistant frame components contribute to the longevity of the structure.

**Comfort and Functionality:** Wedding marquees are built with the principle of comfort and functionality, providing a comfortable environment for wedding guests while accommodating essential amenities such as heating, cooling, lighting, and sound systems. Proper ventilation and insulation are also considered to ensure guest comfort in any weather.

**Compliance and Safety:** Wedding marquees adhere to safety standards and regulations to ensure the well-being of guests and personnel. This involves conducting structural assessments, obtaining necessary permits, and implementing safety measures such as fire retardant materials, emergency exits, and secure anchoring systems.

## **FAQ:**

### **Q: Can you print our logos on the tent?**

Yes. Customized logos can be printed on the tent fabric according to your requirements.

### **Q: Is that factory price?**

Yes. We assure you all prices are based on factory.

### **Q: Does your tent be able to installed repeatedly? What is the life span?**

Our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

### **Q: What documents are available?**

A full range documents including structural drawings, packing list, installation manual and relative certificates can be provided. Moreover, customs declaration is provided. We provide one-stop service for you.
