Snow load	75kg/sqm (snow can't stay if use big degree roof pitch design)
Easy to be assembled and dismantled, movable.聽No pole inside, 100% available interior space.	

Product introduction highlighting their key features and benefits:

Distinctive Design: Arcum Aluminum tents feature a unique curved roof design that sets them apart from traditional tents. This elegant and modern architectural style adds sophistication and visual appeal to any outdoor event.

Spacious Interiors: These tents offer spacious and unobstructed interiors, thanks to their curved roof design and absence of center poles or support columns. This ample space allows for flexible layout configurations and accommodates large gatherings comfortably.

Durable Construction: Constructed with high-quality aluminum frames, Arcum Aluminum tents are sturdy and durable, capable of withstanding various weather conditions. The frames are corrosion-resistant and lightweight, ensuring long-term reliability and ease of handling during installation and dismantling.

Weather Resistance: The fabric covers of Arcum Aluminum tents are typically made of high-grade PVC or polyester materials, known for their excellent weather resistance. These materials provide protection against rain, wind, UV rays, and other outdoor elements, ensuring a safe and comfortable environment for event attendees.

Customization Options: Arcum Aluminum tents offer a range of customization options to suit specific event requirements and preferences. Customers can choose from various sidewall configurations (clear, solid, or mesh), flooring options, lighting setups, and additional accessories to create a tailored and personalized tent space.

Versatile Applications: Arcum Aluminum tents are suitable for a wide range of outdoor events, including weddings, corporate functions, trade shows, exhibitions, festivals, concerts, and more. Their versatility and adaptability make them a popular choice among event planners, rental companies, and venue operators.

Ease of Installation: Despite their large size and sophisticated design, Arcum Aluminum tents are relatively easy to install and dismantle. The modular construction and lightweight components streamline the setup process, saving time and labor costs for event organizers and rental companies.

Portability: While Arcum Aluminum tents are designed for semi-permanent or temporary installations, they are also portable and can be transported to different locations as needed. This portability makes them an excellent choice for touring events, outdoor festivals, and temporary venues.

FQA:

Q1. Are you factory or trade company?

We are direct factory.

Q2. What is your Payment terms?

T/T is available.

Q3. Is your tent strong and stable enough,How about the wind loading?

Yes, Steel structure and cover wind resistance and load bearing is calculated by professional software and Experienced engineer team , will be more than we planned 50%.The wind load at least more than 80KM/H.

Q4. What's the material of the cover,does it can last long time?

The cover material is PVDF or PTFE.PVDF can last more than 15-20 years.PTFE can last more than 50 years.It have fabric inside,so it very strong ,not easy to be torn.

Q5. When will you ship the orders?

Once the design of tent is confirmed, we will arrange production plan, and inform you of the leadtime, generally it takes about 7-25 working days.

Q6. What is the total price include freight?

The total price is based on the design of the product and the requirements of the customer, all subject to the final calculation.
