- Snow load: 75kg/sqm (snow can't stay if use big degree roof pitch design)
- Easy to be assembled and dismantled, movable.
- No pole inside, 100% available interior space.

Key features:

Aluminum Frame: The tent is constructed with a sturdy aluminum frame that provides structural support and stability. Aluminum is lightweight yet durable, making it suitable for temporary structures like event tents. The frame is resistant to rust and corrosion, ensuring long-term reliability.

Waterproof Fabric: The tent is covered with waterproof fabric that effectively repels water and keeps the interior dry during rainy conditions. The fabric is typically made of PVC-coated polyester or similar materials with waterproofing properties. It prevents water from seeping through, ensuring a comfortable and dry environment for event attendees.

Curved Roof Design: The tent features a curved roof design, which not only enhances the aesthetic appeal but also improves water runoff. The curved shape helps to prevent water from pooling on the roof, reducing the risk of leaks and water damage. It also adds an elegant and modern touch to the tent's appearance.

Spacious Interior: The tent offers a spacious interior with ample room for various event setups, including seating arrangements, stages, dance floors, and more. The open layout allows for flexible event planning and accommodates large gatherings comfortably.

Quick Assembly: The tent is designed for easy and quick assembly, thanks to its modular construction and user-friendly installation process.

With the help of a professional installation team, the tent can be set up efficiently, minimizing downtime and ensuring timely event preparation.

Versatility: The tent is versatile and suitable for a wide range of outdoor events, including weddings, parties, corporate functions, trade shows, festivals, and more. It can be customized to meet specific event requirements and can be adapted to different event themes and decor styles.

Weather Resistance: In addition to being waterproof, the tent is designed to withstand various weather conditions, including wind, sun exposure, and temperature fluctuations. Reinforced stitching, sturdy anchoring systems, and wind-resistant features help ensure the tent remains secure and stable in adverse weather conditions.

Optional Accessories: The tent can be equipped with optional accessories to enhance functionality and comfort, such as sidewalls, flooring solutions, lighting, heating, air conditioning, and branding opportunities. These accessories can be tailored to suit the specific needs and preferences of the event.

FQA:

1. Are you a trading company or manufacturer?

We are manufacturer, so we can give you competitive prices.
