Product Description

Aluminum Frame Waterproof Curve Events Tent With Glass Wall For Luxury Wedding Trade Show Etc

Product Parameter :

Frame Material	Hard Pressed Extruded Aluminum Alloy T6061/T6
PVC Cover	PVC Double-Side Coated Polyester Fabric
Feature	Flame Retardant/UV-resistant/Water Proof
Color	White,Transparent or Customized Color
Temperature Resistance	-30 degree Celsius~+70 degree Celsius
Service Life	More Than 20 years for frame, 6 years for PVC Cover
Installation	easy and fast to assemble and dismantle. We will offer the installation manual and vedio

Width/m	Side Height/m	Top Height/m	Frame Size/mm	Length/m
6m	2.5m	4.27m	48*84*3	Customized
10m	2.5m	5.29m	122*68*3	Customized
15m	3m	6.95m	166*88*3	Customized
20m	3m	8.12m	112*203*4	Customized
25m	3m	9.28m	112*203*4	Customized
30m	4m	11.45m	120*254*4	Customized
35m	4m	12.63m	120*300*5	Customized
40m	4m	13.78m	120*350*5	Customized

Application:

Product features:

- 1.novel design, reasonable structure
- 2.with fire protection, self cleaning, anti wind and snow
- 3.using geodesic dome tent profiles as double as the top PVC waterproof tarpaulin cloth

Some common material options for peach shape tents:

PVC (Polyvinyl Chloride) Fabric: PVC fabric is a popular choice for tent canopies due to its durability, waterproof properties, and resistance to

UV rays. It provides excellent protection against rain and sunlight, making it suitable for outdoor events in various weather conditions.

Polyester Fabric: Polyester fabric is lightweight, strong, and resistant to wrinkles and abrasions. It can be coated with PVC or other waterproofing agents to enhance its water resistance. Polyester fabric is available in a wide range of colors and patterns, offering versatility in tent design.

Canvas: Canvas is a traditional tent material known for its breathability and natural appearance. While not as waterproof as PVC or polyester, treated canvas can provide adequate protection against light rain and moisture. Canvas tents have a classic aesthetic and are often preferred for rustic or vintage-themed events.

Vinyl: Vinyl-coated fabrics offer durability and waterproofing similar to PVC but with a softer texture. They are resistant to tearing, stretching, and UV damage, making them suitable for long-term outdoor use. Vinyl fabrics are available in different weights and thicknesses to meet specific requirements.

Acrylic Fabric: Acrylic fabrics offer a balance of durability, water resistance, and breathability. They are often used for tent canopies and sidewalls, providing protection against rain while allowing air circulation to prevent condensation buildup. Acrylic fabrics are available in a variety of colors and are resistant to fading and mildew.

Polyethylene (PE) Fabric: PE fabric is lightweight, cost-effective, and easy to maintain. While not as durable as PVC or vinyl, it offers adequate waterproofing for temporary outdoor events. PE fabric is available in different grades, with higher grades offering better tear resistance and UV protection.

Aluminum Alloy Frame: In addition to canopy materials, the frame of a peach shape tent is typically made of aluminum alloy for its lightweight, strength, and corrosion resistance. Aluminum frames are easy to assemble, transport, and maintain, making them ideal for portable event structures.

Optional Accessories:

1. **Size :** Customizable
2. **Covering:** colorful cover, transparent cover
3. **Windows:** round or square clear PVC window, glass window for glass wall
