20	28.26	8	42*3
25	28.26	10	42*3
35	28.26	13	68*3

Some common material options for glamping tents include:

Canvas: Canvas tents are a popular choice for glamping due to their durability, breathability, and classic aesthetic. Canvas tents are typically made from cotton or a cotton-polyester blend, offering excellent durability and weather resistance. They provide a cozy and comfortable atmosphere inside the tent and can be treated with waterproof coatings for added protection.

Polyester: Polyester tents are lightweight, quick-drying, and highly resistant to UV rays and mildew. They offer excellent durability and are often more affordable than canvas tents. Polyester tents are available in a wide range of colors and designs and are easy to clean and maintain.

Nylon: Nylon tents are lightweight, tear-resistant, and quick-drying, making them ideal for glamping in a variety of environments. They offer excellent durability and are highly packable, making them easy to transport and set up. Nylon tents are often treated with waterproof coatings to enhance their weather resistance.

Polycotton: Polycotton tents combine the breathability of cotton with the durability of polyester, offering the best of both worlds. Polycotton tents are highly breathable, allowing for excellent ventilation and airflow inside the tent. They are also durable, water-resistant, and resistant to UV rays and mold growth.

Ripstop Fabric: Ripstop fabric is a type of fabric that is woven with reinforcement threads in a crosshatch pattern to prevent tears and rips from spreading. Ripstop tents are highly durable and resistant to tearing, making them suitable for use in rugged outdoor environments.

PVC: PVC (polyvinyl chloride) tents are made from a durable, waterproof material that is easy to clean and maintain. PVC tents are highly weather-resistant and offer excellent protection from rain, wind, and UV rays. They are often used for semi-permanent or permanent glamping installations.

Mesh: Mesh tents feature large mesh panels that provide excellent ventilation and airflow while keeping insects and bugs out. Mesh tents are ideal for warm weather camping and provide a comfortable and breezy atmosphere inside the tent.

Recycled Materials: Some glamping tents are made from recycled materials, such as recycled polyester or recycled canvas. These tents offer excellent durability and sustainability credentials, making them an eco-friendly choice for environmentally conscious campers.

FQA:

1.Do you offer customization?

Yes, we offer customized service. You can customize the size, color, logo and so on according to your need.

2.Does your tent be able to install repeatedly?

Yes, our tent can be assembled and dismantled repeatedly.
